wider global agenda by tackling inequality and disadvantage early on in children's lives. However, these strategies have also raised further debates regarding the way they have informed and shaped curricula frameworks and pedagogical approaches. The international team of contributors to this book argue that if these issues are not explicitly acknowledged, understood, critiqued, and negotiated, emerging policies and documents may potentially lead to disadvantaging, marginalising, and even pathologising certain childhoods. Divided into two parts, the volume demonstrates the dialectic nature of both policy and practice. The chapters in this wide-ranging text explore and articulate the philosophical premises and values that underpin current early childhood policy, curricula, and pedagogies; explicitly acknowledge and articulate some of potential conflicts and challenges they present; provide examples of divergent and creative pedagogical thinking; highlight opportunities for enabling pedagogical cultures and encounters. *Debates on Early Childhood Policies and Practices* is aimed at a wide readership including academics and researchers in early years education, policy makers, undergraduate and postgraduate students, practitioners, and early childhood professionals.

Kindergarten Primary Magazine, 1909 *Kindergarten and First Grade*, 1921 *The Kindergarten-primary Magazine*, 1910 The World of Science Education, 2010-01-01 Each volume in the 7 volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia, and New Zealand, Europe, and Israel, Arab States, and Sub-Saharan Africa. The focus of this Handbook is on science education in Asia and the scholarship that most closely supports this program. The reviews of the research situate what has been accomplished within a given field in an Asian rather than an international context. The purpose, therefore, is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished, what is missing, and what might be done next. *Kindergarten Magazine and Pedagogical Digest* Bertha Johnston, E.
