Helping Children Learn Mathematics Robert Reys, Mary Lindquist, Diana V. Lambdin, Nancy L. Smith, 2014-11-03 The 11th Edition of Helping Children Learn Mathematics is designed to help those who are or will be teachers of mathematics in elementary schools help children develop understanding and proficiency with mathematics so they can solve problems This text is built around three main themes helping children make sense of mathematics incorporating practical experiences and using research to guide teaching It also integrates connections and implications from the Common Core Standards

Mathematics CCSS M **Proceedings of the 4th Green Development International Conference (GDIC 2022)** Dwi Agus Kurniawan, 2023-11-03 This is an open access book As the biggest university in Jambi province Indonesia Universitas Jambi has played an essential role as a key player in both human and natural resources development in Jambi province We have successfully developed cooperation in all sectors of development in Jambi province Indonesia We have contributed to a variety of activities such as research community services consultancies and training services and provided some experts to speed up the development of Jambi Province and Indonesia in general Today Jambi University consistently seeks innovative methods to participate more actively in an inter discipline study for sharing research on green development in all areas of knowledge science and expertise In doing so the Research and Community Service Institute LPPM of Universitas Jambi hosted the fourth Green Development International Conference in 2022 carried out once every two years This Conference aims to provide insightful information concerning the development of a number of innovations in science and technology that are environmentally friendly covering the fields of technology environment agriculture energy health Law education and humanities *Diverse educational contexts and research on metacognition and motivation to enhance self-directed learning*

Bernadette Geduld, Byron J. Bunt, Divan Jagals, 2025-02-17 This scholarly book explores the latest education research on metacognition and self directed learning providing practical insights for educators and students As the thirteenth volume in the NWU Self Directed Learning Series it focuses on developing metacognitive skills to enhance self regulation motivation and independent thinking key competencies for success in the 21st century Metacognition plays a vital role in learning helping students plan evaluate and self assess their progress Research shows that students with strong metacognitive strategies achieve better learning outcomes apply knowledge effectively and persist through academic challenges This book offers evidence based teaching strategies to support the development of self regulated learning and motivation in diverse educational settings It examines teaching behaviour and instructional methods that foster metacognitive growth in both basic and higher education With a particular focus on the South African education landscape it extends research in cognitive developmental and applied psychology Researchers and educators will find practical approaches for integrating metacognition into various disciplines making this book a valuable resource for both undergraduate and graduate education programmes Content-Based Curriculum for Advanced Learners Joyce VanTassel-Baska, Catherine A. Little, 2023-01-23

The fourth edition of Content Based Curriculum for Advanced Learners provides readers with a complete and up to date introduction to core elements of curriculum development in gifted education with implications for school based implementation Written by key experts in the field this text is essential to the development of high powered rich and complex curricula that treat content process product and concept development considerations as equal partners in the task of educating gifted learners Along with revised chapters this edition contains new chapters on culturally responsive curriculum the performing arts robotics and engineering design as well as social and emotional learning Additional material concerning talent trajectories across the lifespan accompanies a discussion of honors curriculum in higher education rounding out this comprehensive resource This master text is a must read for educators interested in executing effective curriculum and instructional interventions to support learning for gifted and advanced learners

Abstract Mathematical Cognition
Wolfgang Grodd,Philippe Chassy,2016-08-09 Despite the importance of mathematics in our educational systems little is known about how abstract mathematical thinking emerges Under the uniting thread of mathematical development we hope to connect researchers from various backgrounds to provide an integrated view of abstract mathematical cognition Much progress has been made in the last 20 years on how numeracy is acquired Experimental psychology has brought to light the fact that numerical cognition stems from spatial cognition The findings from neuroimaging and single cell recording experiments converge to show that numerical representations take place in the intraparietal sulcus Further research has demonstrated that supplementary neural networks might be recruited to carry out subtasks for example the retrieval of arithmetic facts is done by the angular gyrus Now that the neural networks in charge of basic mathematical cognition are identified we can move onto the stage where we seek to understand how these basics skills are used to support the acquisition and use of abstract mathematical concepts

AISTSSE 2018
Martina Restuati ,Herbert Sipahutar,Juniastel Rajagukguk,2019-10-04 This book contains the proceedings of the The 5th Annual International Seminar on Trends in Science and Science Education AISTSSE and The 2nd International Conference on Innovation in Education Science and Culture ICIESC where held on 18 October 2018 and 25 September 2018 in same city Medan North Sumatera Both of conferences were organized respectively by Faculty of Mathematics and Natural Sciences and Research Institute Universitas Negeri Medan The papers from these conferences collected in a proceedings book entitled Proceedings of 5th AISTSSE In publishing process AISTSSE and ICIESC were collaboration conference presents six plenary and invited speakers from Australia Japan Thailand and from Indonesia Besides speaker around 162 researchers covering lecturers teachers participants and students have attended in this conference The researchers come from Jakarta Yogyakarta Bandung Palembang Jambi Batam Pekanbaru Padang Aceh Medan and several from Malaysia and Thailand The AISTSSE

meeting is expected to yield fruitful result from discussion on various issues dealing with challenges we face in this Industrial Revolution RI 4 0 The purpose of AISTSSE is to bring together professionals academics and students who are interested in the advancement of research and practical applications of innovation in education science and culture The presentation of such conference covering multi disciplines will contribute a lot of inspiring inputs and new knowledge on current trending about Mathematical Sciences Mathematics Education Physical Sciences Physics Education Biological Sciences Biology Education Chemical Sciences Chemistry Education and Computer Sciences Thus this will contribute to the next young generation researches to produce innovative research findings Hopely that the scientific attitude and skills through research will promote Unimed to be a well known university which persist to be developed and excelled Finally we would like to express greatest thankful to all colleagues in the steering committee for cooperation in administering and arranging the conference Hopefully these seminar and conference will be continued in the coming years with many more insight articles from inspiring research We would also like to thank the invited speakers for their invaluable contribution and for sharing their vision in their talks We hope to meet you again for the next conference of AISTSSE

Illuminating and Advancing the Path for Mathematical Writing Research Colonnese, Madelyn W.,Casa, Tutita M.,Cardetti, Fabiana,2023-11-20

Mathematical writing is essential for students math learning but it s often underutilized due to unclear guidelines Mathematical writing is a mode of communication that provides teachers access to their students thinking and importantly offers students an opportunity to deepen their mathematical understanding engage in mathematical reasoning and learn a fundamental way to communicate mathematically Notably one needs to be able to judiciously combine mathematical symbols representations and text However more research is needed to exemplify the qualities of mathematical writing develop implementation methods and support teachers Illuminating and Advancing the Path for Mathematical Writing Research is a necessary comprehensive resource designed to enhance mathematical writing and promote equitable learning This research book provides a comprehensive understanding of the current state of mathematical writing and illuminates various perspectives on moving the teaching and learning of k 12 mathematical writing forward Mathematical writing is an important yet underutilized component of mathematical discourse and this book offers further insight into understanding what it means to write mathematically for mathematics educators and researchers It informs with research based implementation strategies and creates purposeful professional learning opportunities Ultimately k 12 students will benefit from a more informed field because they will have access to a vital mode of mathematical reasoning and communication

Numerical Development - From cognitive functions to neural underpinnings Korbinian Moeller,Elise Klein,Klaus F Willmes - von Hinckeldey,Karin Kucian,2015-02-24 Living at the beginning of the 21st century requires being numerate because numerical abilities are not only essential for life prospects of individuals but also for economic interests of post industrial knowledge societies Thus numerical development is at the core of both individual as well as societal interests There is the notion that we are already

born with a very basic ability to deal with small numerosities Yet this often called number sense seems to be very restricted approximate and driven by perceptual constraints During our numerical development in formal e g school but also informal contexts e g family street we acquire culturally developed abstract symbol systems to represent exact numerosities in particular number words and Arabic digits refining our numerical capabilities In recent years numerical development has gained increasing research interest documented in a growing number of behavioural neuro scientific educational cross cultural and neuropsychological studies addressing this issue Additionally our understanding of how numerical competencies develop has also benefitted considerably from the advent of different neuro imaging techniques allowing for an evaluation of developmental changes in the human brain In sum we are now starting to put together a more and more coherent picture of how numerical competencies develop and how this development is associated with neural changes as well In the end this knowledge might also lead to a better understanding of the reasons for atypical numerical development which often has grievous consequences for those who suffer from developmental dyscalculia or mathematics learning disabilities Therefore this Research Topic deals with all aspects of numerical development findings from behavioural performance to underlying neural substrates from cross sectional to longitudinal evaluations from healthy to clinical populations To this end we included empirical contributions using different experimental methodologies but also theoretical contributions review articles or opinion papers

Cognitive and Affective Factors in Relation to Learning Mikaela Nyroos,Johan Korhonen,Riikka Mononen,2022-11-10 Both domain general e g working memory executive functions and domain specific e g number processing phonological processing cognitive factors have been found to predict learning in different age groups Likewise research has shown that various affective factors such as different emotions e g anxiety self concept and interest need to be considered when investigating individual differences in learning However few studies have investigated both cognitive and affective factors simultaneously in relation to learning In particular there is a lack of studies investigating the interplay i e moderation and mediation between cognitive and affective factors on learning The goal of this Research Topic is to deepen our knowledge on the relations between learning and both cognitive and affective factors in different age groups We aim to provide a broad scope of emerging areas in research on cognitive and affective factors especially related to academic learning e g mathematics reading and other school subjects Studies focusing simultaneously looking at the interplay of these constructs as well as longitudinally are of great interest Further we are interested in innovative study designs and recent advances in methodology in this field To promote quality education for all and equity in education cognitive and affective factors related to aspects of learning ranging from pre school to tertiary provision and inclusion of individuals with special educational needs are of interest

The Important Role of the Early School Years for Reading, Writing and Math Development: Assessment and Intervention at School Entry Christoph

Weber, Martin Schöfl, Susanne Seifert, Natalie Förster, 2025-12-01 School entry is a critical life event for young children. Students begin this new phase of their lives with very different abilities due to their individual characteristics, previous experiences, and education. While some children hardly know any letters or numbers, others can already read, write, and calculate quite fluently. To optimally support young learners according to their respective starting conditions, teachers must recognize students' learning prerequisites and adapt instruction to students' needs. To this end, both valid and economical assessments as well as effective and differentiated interventions are needed. This Research Topic addresses new developments in early assessments and assessment-based interventions around the time of school entry from the last year before enrollment until second grade. In particular, this Research Topic aims to bring together research that directly contributes to assessing children's difficulties and providing evidence-based support. We highly welcome new innovative approaches from the fields of education, didactics, and psychology that focus on the assessment and assessment-based instruction in reading, writing, and maths. Any empirical studies that help to improve the assessment and assessment-based interventions for the competencies mentioned are welcome. We are looking for empirical quantitative or qualitative studies dealing with the target group of children around the age of school entry, last year of kindergarten to second grade elementary school, that include at least one of the following topics: the presentation or testing of new assessment procedures that focus on performance in and prerequisites for reading, writing, and maths; assessment-based interventions, both whole class or individual approaches in reading, writing, and maths; the co-development of sub-skills in reading, writing, and maths; and consequences for assessment and intervention. Please note that manuscripts without prior submission of an abstract will not be considered for the research topic.
