

4. Install the lower case on the switch box or directly on the wall.
When using the switch box:

- When installing directly on the wall:

CAUTION Do not tighten the screws too tight. Doing so may deform or crack the lower cover.

- NOTE:**
- Choose a flat plane for installation.
 - Fasten the switch box at more than two places when installing directly on the wall.
 - When re-installing on the wall, fasten securely using anchors.

5. Connect the remote control cord to the remote controller terminal block.

To indoor unit MA remote controller or A control terminal block

There is no polarity.

CAUTION Do not use clamp terminals to connect to remote controller terminal blocks. The terminals may contact the board and cause trouble or contact the cover and damage the cover.

6. When using two remote controllers in one group, set the dip switches.

- When using two remote controllers in one group, specify the main and sub remote controllers using dip switch No. 1 shown below.
- When connecting only one remote controller to one group, it is always the main remote controller. When connecting two remote controllers to one group, set one remote controller as the main remote controller and the other as the sub remote controller.
 - The factory setting is "Main".

Setting the dip switches

The dip switches are at the bottom of the remote controller. Remote controller Main/Sub and other function settings are performed using these switches. Ordinarily, only change the Main/Sub setting of SW1. (The factory settings are all "ON".)

SW No	SW contents Main	ON	OFF	Comment
1	Remote controller Main/Sub setting	Main	Sub	Set one of the two remote controllers at one group to "Main"
2	When remote controller power turned on	Normally on	Timer mode on	When you want to return to the timer mode when the power is restored after a power failure when a Program timer is connected, select "Timer mode".
3	Cooling/heating display in AUTO mode	Yes	No	When you do not want to display "Cooling" and "Heating" in the Auto mode, set to "No".
4	Intake temperature display	Yes	No	When you do not want to display the intake temperature, set to "No".

7. Wiring hole for installing directly on the wall (or open wiring):

- Cut off the shaded area from the upper cover using a knife, nippers, etc.
- Take out the remote control cord connected to the terminal block via this portion.

8. Install the cover to the remote controller.

To remove the cover, insert a minus screwdriver into one of the open slots, and move it in the direction of the arrow shown in the figure.

First, hook the cover to the two upper claws and then fit it to the remote controller.

CAUTION Press the cover until it snaps shut. If not, it may fall off. **CAUTION** Do not insert the screwdriver in the slot. Doing so may damage the slot.

NOTE: A protection sheet is stuck to the operation section. Peel off this protection sheet before use.

9. Affix a caution label.

A caution label in English is supplied on the back surface of the control panel door. Affix another caution label in the language of a country where you use the remote controller over the English one.

5 How To Connect Optional Parts

- The exterior design for PAC-SC32PTA (Program timer) is different from the one for PAR-20MAA.
 - When connecting a Program timer, connect a 5-core cable to the connector on the remote controller. (A 5-core cable is supplied with the Program timer.)
 - To route the cable, cut off the thin-wall portion.
 - For wiring path convenience, install the Program timer to the left-hand side of the remote controller. When expansion is expected, take into consideration remote controller space at the left-hand side.
- For the operation method details, refer to the Program timer installation manual.
