**School Mathematics Curricula** Catherine P. Vistro-Yu, Tin Lam Toh, 2019-04-26 This book sheds light on school mathematics curricula in Asian countries including their design and the recent reforms that have been initiated. By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries' unique approaches to supplementing school mathematics curricula, it contributes to shaping effective policies for implementation, assessment and monitoring of curricula. The book covers a wide range of issues: curriculum design, localization of curricula, directions of curricular reforms, mathematics textbooks, assessment within the curriculum and teachers' professional development, which are of interest to a wide international audience.

**Unpresidented** Martha Brockenbrough, 2018-12-04 A riveting, meticulously researched and provocative biography of Donald J. Trump from the author of *Alexander Hamilton: Revolutionary Born*. Into a family of privilege and wealth, he was sent to military school at the age of 13. After an unremarkable academic career, he joined the family business in real estate and built his fortune. His personal brand: sex, money, and power. From *no holds barred* reality TV star to unlikely candidate, Donald J. Trump rose to the highest political office: President of the United States of America. Learn fascinating details about his personal history, including why Trump's grandfather left Germany and immigrated to America. Why Woodie Guthrie wrote a song criticizing Trump's father. How Trump's romance with Ivana began and ended. When Trump first declared his interest in running for President. Discover the incredible true story of America's 45th President: his questionable political and personal conduct and his unprecedented rise to power. Richly informed by original research and illustrated throughout with photographs and documents, *Unpresidented* is a gripping and important read.

**Military Integration during War-to-Peace Transitions** Lesley Anne Warner, 2023-06-07 In the 1960s, only 10% of peace agreements included some element of political/military accommodation, namely military integration. From Burundi to Bosnia to Zimbabwe, that number had increased to over 50% by the 2000s. However, relatively little is understood about this dimension of power sharing often utilized during war-to-peace transitions. Through an examination of the case of South Sudan between 2006 and 2013, this book explores why countries undergoing transitions from war to peace decide to integrate armed groups into a statutory security framework. This book details how integration contributed to short-term stability in South Sudan, allowing the government to overcome wartime factionalism and consolidate political/military power prior to the referendum on self-determination in 2011. It also examines how the integration process in South Sudan was flawed by its open-ended nature and lack of coordination with efforts to right-size the military and transform the broader defense sector, and how this led the military to fragment during periods of heightened political competition. Furthermore, the book explains why integration ultimately failed in South Sudan and

identifies the wider lessons that could be applied to current or future war to peace transitions This book will be of great interest to students of war and conflict studies peacebuilding post conflict reconstruction African security issues and International Relations in general as well as to practitioners

**Future Earth** Diana Dalbotten, Gillian Roehrig, Patrick Hamilton, 2014-06-23 Earth now is dominated by both biogeophysical and anthropogenic processes as represented in these two images from a simulation of aerosols Dust red from the Sahara sweeps west across the Atlantic Ocean Sea salt blue rises into the atmosphere from winds over the North Atlantic and from a tropical cyclone in the Indian Ocean Organic and black carbon green from biomass burning is notable over the Amazon and Southeast Asia Plumes of sulfate white from fossil fuel burning are particularly prominent over northeastern North America and East Asia If present trends of dust emissions and fossil fuel burning continues in what we call the Anthropocene epoch then we could experience high atmospheric CO2 levels leading to unusual warming rarely experienced in Earth's history This book focuses on human influences on land ocean and the atmosphere to determine if human activities are operating within or beyond the safe zones of our planet's biological chemical and physical systems Volume highlights include Assessment of civic understanding of Earth and its future Understanding the role of undergraduate geoscience research and community driven research on the Anthropocene Effective communication of science to a broader audience that would include the public the K 12 science community or populations underrepresented in the sciences Public outreach on climate education geoscience alliance and scientific reasoning Future Earth is a valuable practical guide for scientists from all disciplines including geoscientists museum curators science educators and public policy makers

Monetary Policy after the Great Recession Arkadiusz Sieroń, 2020-11-09

Walter Bagehot noticed once that John Bull can stand many things but he cannot stand two per cent Well for several years he has had to stand interest rates well below that in some countries even below zero However despite this sacrifice the economic recovery from the Great Recession has been disappointingly weak This book s aim is to answer this question The central thesis of the book is that the standard understanding of the monetary transmission mechanism is flawed That understanding adopts erroneous assumptions such as that low interest rates always stimulate economic growth by boosting the credit supply investment and consumption and does not fully take into account several unintended channels of monetary policy such as risk taking high level of debt or zombification of the economy In other words the effectiveness of monetary policy is limited during economic downturns accompanied by the debt overhang and the balance sheet recession and generates negative effects which can make the policy counterproductive The author provides a thorough analysis of the issues related to the interest rates in the conduct of monetary policy such as the risk taking channel of monetary policy the portfolio balance channel and the wealth effect zombie firms in the economy the misallocation of resources as well as the neutral interest rate targeting and the difference between the neutral and natural interest rate and the negative interest rate policy The book is written in an accessible and engaging manner and will be a valuable resource for scholars of monetary economics as well as readers interested in unconventional monetary policy
