Universe sending me messages I didn't believe in the existence of anything beyond my square box I thought that if you couldn't see it it didn't exist 3 I had to learn that I must see the truth in everything no matter how bleak things looked I was about to enter a passage in my life that transformed everything about my reality 4 I was completely jaded with the world and yet I still had the courage to buy Tony Robbins's Personal Power II program It changed my life I wrote down my goals from the type of person I wanted to be perceived as among my family and peers to the relationship I wanted to attract into my life

Cupcakes and Cocaine is the story of a girl who tried too hard and used too much to have too much but by losing it all she found herself and became the woman she was destined to be **Mysterious Entanglement** Jerrold Winger, 2009-12-15

About The Book I believe that it is our destiny to wonder at and seek after the mystery that is our origin as humans and our place in the Universe To explore this mystery the greatest minds of 40 millennia have created the most wondrous fabric of possibilities with threads of imagination change color denier weave and substance Sometimes we called this mystery Religion and sometimes we called it Science and for most our sentient existence we saw no conflict between the two Both had dogma which from time to time was shown to be misdirected Both had periods when they were in apparent conflict and periods when they were in complete harmony Both Science and Religion evolved sometimes in spectacular leaps of mind and faith The strangest part of this evolution has been the discovery that at the deepest level of human cognition of Science or Religion the quest has been and will be the same namely the search to understand The Creation we live in The Creator and the Origin of Life The strangest irony has been that there is always a considerable gap of uncertainty in both Science and Religion and the answer to Creation The Creator and Life no matter how far or fast we evolve We are never the less always confused by our knowledge and with our prejudices and intolerance Science is only an approximation to the physical nature around us Religion is only an approximation to our spiritual nature within and around us We often get both wrong from time to time and are compelled to change We may find in time that Science and Religion are indeed two sides of the same coin *The Work* William Simon, 2016-01-26
