

Management Consulting Career Guide

OVERVIEW

At the most basic level, management consultants act as external advisors, helping organizations solve challenging problems. Although traditionally this field has been dominated by MBAs—and is famous for its on-campus recruiting of undergraduates— a growing number of consulting firms appreciate the value of advanced academic degrees. Depending on the firm, this may mean a greater appetite for master's students, doctoral candidates, or both. Consulting careers offer the ability to engage intellectually with difficult problems while moving into a faster-paced work environment than the one to which many graduate students and postdocs may be accustomed. For consulting firms, advanced-degree holders represent analytical thinkers who are often able to complement MBA talent by taking creative—and even unexpected—approaches to answering questions.

Advantages	Potential Challenges
Intellectually stimulating work environment	Some positions require up to 80% travel
High potential impact of work	Long hours are common
Array of career trajectory options	Stressful work with demanding clients
Extensive training provided by firms	Highly competitive colleagues
Ability to work on different types of projects	Clients may not follow recommendations
Easy to build your professional network	Research standards often lower than academia
High compensation rates	Adjusting to a faster pace of work

CAREER TRAJECTORY

New consultants who enter a firm with a PhD (or a Master's degree plus a few years of previous work experience) often start at the same level as new MBAs. This level has different titles at different firms and is usually one rank above new consultants that enter directly after their undergraduate studies. Promotions are common within the first two years, and many firms employ an "up or out" policy in which a consultant is either promoted or encouraged to look for other opportunities (note that top consulting firms provide career services to help consultants make this transition). Many people leave consulting after a year or two to pursue other interests, often through connections they have formed with clients. However, some prefer to stay in consulting and work toward becoming a partner. Along this trajectory, the consultant takes on increasing project management responsibilities and plays a larger role in building relationships with new and existing clients to generate contracts for the firm.
