How Management Accounting Information Supports Decision Making

QUESTIONS

- 1-1** Management accounting is a discipline that designs planning and performance measurement systems, using financial and nonfinancial information, to help an organization develop and implement its strategy. The information must be relevant and helpful, and customized to serve multiple purposes, such as making decisions, allocating resources, and monitoring, evaluating, and rewarding performance.  - Financial accounting has to be consistent with the rules framed by the standard setters and the regulatory authorities. Management accounting is
