Language and Sustainable Development Lisa J. McEntee-Atalianis, Humphrey Tonkin, 2023-03-03 This book addresses the importance of language in matters of sustainability and incorporating such concerns in implementing the UN's Sustainable Development Goals (SDGs). Sustainable language policy must aim to include all groups including language minorities and marginalized populations such as refugees and aid recipients in conditions that allow for their inclusion in making and implementing policy. The book brings together nine studies covering such topics as language and digital resources, sustainable and inclusive multilingual education, national language policy, and language in peacekeeping operations. A final chapter addresses the crucial intersection between sociolinguistics and economics and the implications of this for development and the SDGs.

The World Economy Dale W. Jorgenson, Kyoji Fukao, Marcel P. Timmer, 2016-11-24 The balance of the world economy is shifting away from the established economies of Europe, Japan, and the USA towards the emerging economies of Asia, especially India and China. With contributions from some of the world's leading growth theorists, this book analyses the long term process of structural change and productivity growth across the world from a unique comparative perspective. Ongoing research from the World KLEMS Initiative is used to comparatively study new sources of growth including the role of investment in intangible assets, human capital, technology catch up, and trade in global value chains. which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

The effect of Black Economic Empowerment (BEE) on racial inequality in South Africa Korbinian Stinglhamer, 2017-10-11 Seminar paper from the year 2016 in the subject Economics Case Scenarios grade 1.0 University of Wisconsin Madison Economics course Economics 477 Economic Development of Africa language English abstract This paper investigates the Black Economic Empowerment BEE program in South Africa and its economic justification by analyzing the trends in both intra and interracial inequality since the implementation of BEE Even though inequality is driven by many different factors this paper attempts to analyze whether BEE was able to effectively reduce

inequality in the way that it was intended My findings suggest that BEE might have helped to reduce inequality between different races but that it increased inequality among black people During Apartheid black people were excluded from major parts of South Africa s economy This resulted in an unequal income distribution in South Africa Even after Apartheid ended in 1994 income was distributed unequally between races In order to reduce this inequality and equalize opportunities between the different races in South Africa the government implemented an affirmative action program called Black Economic Empowerment BEE in 2003 In this case and in the following sections the word black defines a racial group including Africans coloreds and Indians and can thus be used as synonym for non whites BEE introduced a scorecard which rates companies based on their economic inclusion of black people If the respective company receives a low rating on the scorecard there will likely be a negative effect on their profit compared to a company with a high rating The basic critique of BEE is that its main beneficiary is a small elite Studies about the actual effects of BEE are rare as data on this topic is limited

Economic Analysis of Supply and Demand for Food Up to 2030 Audun Lem, Trond Bjørndal, Alena Lappo, 2014 With the worlds population expected to reach 8.2 billion people by 2030 and with 842 million people estimated as having been undernourished in the period 2011-13 food supply will present a growing challenge in the next two decades With increases in income along with demographic changes related to family size population ageing and urbanization and consumer trends such as concerns for healthy eating and sustainable production there will be great shifts in demand and major changes in the composition of demand This will in turn have an impact on food supply which will need to both increase and become more efficient if it is to grow within the constraints presented by the availability of natural resources and existing technology This publication presents projections of future food supply up to 2030 building on existing analyses but also providing more economic perspectives on the future evolution of food production
