world moves from analog to digital television Presently all existing textbooks dealing with analog television standards NTSC and PAL are becoming obsolete as the prevalence of digital technology continues to become more widespread Now Digital Television Technology and Standards fills the need for a single authoritative textbook that covers all aspects of digital television technology Divided into three main sections Digital Television explores Video MPEG 2 which is at the heart of all digital video broadcasting services Audio MPEG 2 Advanced Audio Coding and Dolby AC 3 which will be used internationally in digital video broadcasting systems Systems MPEG modulation transmission forward error correction datacasting conditional access and digital storage media command and control Complete with tables illustrations and figures this valuable textbook includes problems and laboratories at the end of each chapter and also offers a number of exercises that allow students to implement the various techniques discussed using MATLAB The authors coverage of implementation and theory makes this a practical reference for professionals as well as an indispensable textbook for advanced undergraduates and graduate level students in electrical engineering and computer science programs

Contemporary Communication Systems Using MATLAB John G. Proakis, Masoud Salehi, 2000 This supplement to any standard communication systems text is one of the first books to successfully integrate the use of MATLAB in the study of communication systems concepts and problems It has been developed for instructors and students who wish to make use of MATLAB as an integral part of their study The former will find the means by which to use MATLAB as a powerful tool to motivate students and illustrate essential theory without having to customize the applications themselves the latter will find relevant problems quickly and easily The book includes numerous MATLAB based simulations and examples of communication systems while providing a good balance of theory and hands on computer experience This Updated Printing revises the book and MATLAB files available for downloading from the Brooks Cole Bookware Companion Resource Center Web Site to MATLAB V5

with the used operating system whether it is 32 or 64 bits 4 The F5 code contains the function to form the image matrix to show the input and output images Running this function requires ALL the Sallee s Toolbox to be installed Otherwise the user can REMOVE this function from the code since it doesn t affect the main F5 process and thus keep ONLY using the main two function of the Sallee s Toolbox 5 The message file we want to hide can be any file of any kind and whatever its extension The size of the message file should be appropriate for the size of the used cover JPEG image so no errors will occur when executed
