**Twenty Years of Education Transformation in Gauteng 1994 to 2014** Maringe, Felix, Prew, Martin, 2015-05-05 *Twenty Years of Education Transformation in Gauteng 1994 to 2014*

An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years. **Kaapse bibliotekaris**, 2012. Adult learning systems play a crucial role in helping people adapt to the changing world of work and develop relevant skills. Community Education and Training has been brought forward as a possible way to foster adult learning in South Africa especially among disadvantaged groups. South Africa. **Leadership Approaches to Negotiate Challenges in a Changing Education Landscape** Leentjie van Jaarsveld, Kobus Mentz, Charl C. Wolhuter, 2020-12-31. The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in South Africa that the national education system is not at a satisfactory level in both the academic and the public discourse. Such allegations are made and frequently stronger adjectives than non-satisfactory are used. Results of international test series in which South Africa has participated such as the 2015 TIMSS tests confirm the negative verdicts found in the public and scholarly discourse. This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors one factor that can make a difference in the achievement levels obtained by learners in schools is leadership. The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation blaming all ills in the education system and educational institutions on historical legacies and/or contextual factors such as socio-economic deprivation in the catchment areas of schools or poor resources and infrastructure. This collected work was inspired by a recently published spate of articles on top performing schools including top performing schools in rural communities in which it was demonstrated that good leadership can overcome such contextual and other challenges. The book unpacks the issue of leadership in South African schools from a variety of perspectives thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa. The target audience of the book is scholars of Educational Leadership. The research reported in the chapters draws on a wide range of methodologies including empirical survey research, questionnaires and interviews, critical literature surveys and the comparative method. **South African national**
