

States of Matter

Delta Science Readers are nonfiction student books that provide science background and support the experiences of hands-on activities. Every Delta Science Reader has three main sections: Think About . . . , People in Science, and Did You Know?

Be sure to preview the reader Overview Chart on page 4, the reader itself, and the teaching suggestions on the following pages. This information will help you determine how to plan your schedule for reader selections and activity sessions.

Reading for information is a key literacy skill. Use the following ideas as appropriate for your teaching style and the needs of your students. The After Reading section includes an assessment and writing links.

OVERVIEW

The Delta Science Reader *States of Matter* introduces students to matter and its physical properties. Students learn about three states of matter: solid, liquid, and gas. They read about changing from one state to another by melting, freezing, evaporation, and condensation. Students meet two scientists who work with matter in different states—one at a crayon factory and another in Antarctica. Finally, they discover how heating gases keeps a hot air balloon afloat.

Students will

- ▶ read about matter
- ▶ identify the properties of solids, liquids, and gases
- ▶ discuss physical changes in matter
- ▶ discuss chemical changes in matter
- ▶ discuss the function of a table of contents, headings, captions, and a glossary
- ▶ make inferences from photographs
- ▶ complete a concept web
