Bennett, 2015-03-23
In 1980 SAGE published Geert Hofstede's *Culture's Consequences* It opens with a quote from Blaise Pascal There are truths on this side of the Pyrenees that are falsehoods on the other The book became a classic one of the most cited sources in the Social Science Citation Index and subsequently appeared in a second edition in 2001 This new SAGE Encyclopedia of Intercultural Competence picks up on themes explored in that book Cultural competence refers to the set of attitudes practices and policies that enables a person or agency to work well with people from differing cultural groups Other related terms include cultural sensitivity transcultural skills diversity competence and multicultural expertise What defines a culture What barriers might block successful communication between individuals or agencies of differing cultures How can those barriers be understood and navigated to enhance intercultural communication and understanding These questions and more are explained within the pages of this new reference work
Key Features 300 to 350 entries organized in A to Z fashion in two volumes Signed entries that conclude with Cross References and Suggestions for Further Readings Thematic Reader's Guide in the front matter grouping related entries by broad topic areas Chronology that provides a historical perspective of the development of cultural competence as a discrete field of study Resources appendix and a comprehensive Index The SAGE Encyclopedia of Intercultural Competence is an authoritative and rigorous source on intercultural competence and related issues making it a must have reference for all academic libraries *Developing Intercultural Competence and Transformation* Victor Savicki, 2023-07-03
Enrollments in international education programs are projected to grow exponentially as students parents and university personnel seek to prepare future leaders who can live and work effectively in a global environment What do we know about the outcomes of such programs and how can educators become more intentional about designing and assessing the impact of such courses How can we help students achieve the intercultural growth and transformation that they may envision as they set forth on their international sojourn International education provides opportunities for students to grow personally and to learn in a rich and intense educational environment The outcomes of such opportunities emphasize not only traditional academic competence but also changes in motivations attitudes self identity and values It is these latter co academic concepts that are the focus of this book Its goal is to give solid substance to the growth and transformation approach to study abroad It defines the central concept of intercultural competence sets it within the framework of transformative learning theory and offers ideas and strategies for facilitating its development In doing so it goes far beyond traditional emphases on the achievement of such formal skills as foreign language
