Raymond Tallis, 2007-11-29 Parmenides of Elea is widely regarded as the most important of the Presocratic philosophers and one of the most influential thinkers of all time He is famous or notorious for asserting that change movement generation and perishing are illusions arising from our senses that past and future do not exist and that the universe is a single homogeneous static sphere This picture of the world is not only contrary to the experience of every conscious moment of our lives it is also unthinkable since thoughts themselves are events that come into being and pass away In this important new book Raymond Tallis critically examines Parmenides conclusions and argues that although his views have had a huge influence they are in fact the result of a failure to allow for possibility for what might be which neither is nor is not Without

possibility there is neither truth nor falsehood Tallis explores the limits of Parmenides ideas his influence on Plato and through him Aristotle and finally why Parmenides is still relevant today **Napoleon** Richmond Sheffield Dement,1893
