FEATURES

Kitab Now

Mini-Cases. Based on real companies, this text includes twelve mini-cases—four of which are new to this edition—to help students understand how IT management techniques are used in business today. These mini-cases are not abbreviated versions of standard, full-length business cases as they differ in two significant ways:

- **A Horizontal Perspective**—These mini-cases take a slice through a number of coexistent issues. Rather than looking for a solution to a specific problem, students must first identify and prioritize the issues, mimicking how real organizations would approach the same challenge.
- **Highly Relevant Information**—Unlike standard cases, which intermix irrelevant information, every sentence of these cases has a purpose and reflects relevant information. As a result, students must analyze each case very carefully so as not to miss critical aspects of the situation.
