Networking and Data Communications Laboratory Manual Frances S. Grodzinsky, 1999 Designed for any introductory networking or data communications course This laboratory manual is designed for the purpose of enhancing the understanding of concepts discussed in a variety of networks and data communications texts This manual represents a work of dedication and collaboration by faculty from universities and colleges across the country Benoit Mandelbrot: A Life In Many Dimensions Michael Frame, Nathan Cohen, 2015-03-02 This is a collection of articles many written by people who worked with Mandelbrot memorializing the remarkable breadth and depth of his work in science and the arts Contributors include mathematicians physicists biologists economists and engineers as expected and also artists musicians teachers an historian an architect a filmmaker and a comic Some articles are quite technical others entirely descriptive All include stories about Benoit Also included are chapters on fractals and music by Charles Wuorinen and by Harlan Brothers on fractals and finance by Richard Hudson and by Christian Walter on fractal invisibility cloaks by Nathan Cohen and a personal reminiscence by Aliette Mandelbrot While he is known most widely for his work in mathematics and in finance Benoit influenced almost every field of modern intellectual activity No other book captures the breadth of all of Benoit's accomplishments *Research Based Undergraduate Science Teaching* Dennis W. Sunal, Cynthia S Sunal, Emmett L. Wright, Cheryl L. Mason, Dean Zollman, 2014-07-01 Research in Science Education RISE Volume 6 Research Based Undergraduate Science Teaching examines research theory and practice concerning issues of teaching science with undergraduates This RISE volume addresses higher education faculty and all who teach entry level science The focus is on helping undergraduates develop a basic science literacy leading to scientific expertise RISE Volume 6 focuses on research

based reforms leading to best practices in teaching undergraduates in science and engineering The goal of this volume is to provide a research foundation for the professional development of faculty teaching undergraduate science Such science instruction should have short and longterm impacts on student outcomes The goal was carried out through a series of events over several years The website at <http://nseus.org> documents materials from these events The international call for manuscripts for this volume requested the inclusion of major priorities and critical research areas methodological concerns and results of implementation of faculty professional development programs and reform in teaching in undergraduate science classrooms In developing research manuscripts to be reviewed for RISE Volume 6 researchers were asked to consider the status and effectiveness of current and experimental practices for reforming undergraduate science courses involving all undergraduates including groups of students who are not always well represented in STEM education To influence practice it is important to understand how researchbased practice is made and how it is implemented The volume should be considered as a first step in thinking through what reform in undergraduate science teaching might look like and how we help faculty to implement such reform
