The Shortcut Guide to Improving IT Service Support Through ITIL Realtimepublishers.com,2007 *The ITIL® v3 - Basics* Anurag Thakur,2018-11-15 Modern day IT Services and its subsequent businesses are going through a vast range of changes These are changes in either demand or the way technology is evolved in the day to day life IT Industry has been

through the phases from business oriented units to end user oriented services If we look into the history of the IT industry then we do not need not go beyond the 20th century It was a UK government initiative that started one of the first frameworks to enhance capacities delivered by IT industry ITIL should be given credit for how the IT development work is conducted in today s scenario When the UK government implemented this framework in general IT practices the IT work was done for the end users but with a focus towards the businesses The enhancements in industry ensured that innovations are part of the industry but now the focus is moved from a phase to other Today a consumer holds the maximum power to influence biggest business decisions Until a few years ago the IT industry had a life that focussed on what requirements clients are looking to fulfill with Now clients have to sustain that trend and add a separate set that talks about their product s end users Infrastructure as a Service IaaS Software as a Service SaaS Platform as a Service PaaS etc came to existence as these gave an idea to address end users expectations directly even when serving the client There are other project management frameworks that assist organisations developing their processes but ITIL has a unique advantage as it guides on not only setting up the process but to add a flavor of the service industry I am trying to put all my professional experiences and knowledge earned through the trainings in this book Wish you all a Happy Learning time [The Official Introduction to the ITIL Service Lifecycle](#) OGC - Office of Government Commerce,2007-05-30 ITIL was created by the UK government in the 1980s as an efficiency improving initiative This text gives an essential guide to the overall structure of ITIL and an outline of its principles *TRIM: The Rational IT model* Pelle Rastock,2016-10-02 TRIM is the acronym for The Rational IT ModelTM This is a vendor neutral reference model that can be used to adopt IT Service Management as a practice The model origins from the experience of more than fifteen years of IT Service Management implementations and describes the foundations and mechanisms of IT Service Management in such a way that it fits all sizes of organizations TRIM is a complete model for IT service delivery based on the ITIL framework that has been simplified and scaled down to a level that all organizations can handle The model includes all the processes roles templates and procedures that you need to implement IT Service Management as a working and efficient production of IT services that provide value to your organization In addition to all the documents the concept of the model is based on a holistic view with functions escalation paths and governance of the organization making it easy to get your entire organization including suppliers to work together The model is easy to understand and to implement It can be used as the basis for an ISO IEC 20000 certification This means that organizations that have decided to adopt ITIL as a source of best practice still can get benefit from using TRIM as a reference model without changing the aim for ITIL or ISO IEC20000 The difference is that ITIL is a framework of best practices while TRIM is a reference model designed to be a guidance in connecting roles and organizational parts to functions and processes so that it becomes clearer how everything is connected in the delivery of IT services Since the model is complete managers and consultants can use this book to get a basic understanding for the mechanisms in delivering IT services and as criteria for

gap analyses TRIM is community driven by its members whose experience will contribute to the future development of the model The members also consist of tool vendors course providers and consultants who have developed a wide range of TRIM specific tool configurations cloud services courses and workshops to make it easier for organizations to adopt the model
