## **Millennium Ecosystem Assessment Biodiversity Synthesis Report:**

*Cents and Sustainability* Cheryl Desha, Charlie Hargroves, Michael Harrison Smith, 2010-09-23 *Cents and Sustainability* is a clear sighted response to the 1987 call by Dr Gro Brundtland in *Our Common Future* to achieve a new era of economic growth that is forceful and at the same time socially and environmentally sustainable The Brundtland Report argued that not only was it achievable but that it was an urgent imperative in order to achieve a transition to sustainable development while significantly reducing poverty and driving clean and green investment With some still arguing for significantly slowing economic growth in order to reduce pressures on the environment this new book *Cents and Sustainability* shows that it is possible to reconcile the need for economic growth and environmental sustainability through a strategy to decouple economic growth from environmental pressures combined with a renewed commitment to achieve significant environmental restoration and poverty reduction Beginning with a brief overview of some of the most pressing environmental challenges of our time the book then explains decoupling theory overviews a number of factors that can undermine and even block efforts to decouple in both developed and developing countries and then discusses a number of key considerations to assist the development of national decoupling strategies The book then focuses on presenting evidence to support greater action not just on climate change but also on decoupling economic growth from the loss of biodiversity and the deterioration of natural systems freshwater extraction waste production and air pollution In the lead up to the 2012 United Nations Earth Summit and beyond *Cents and Sustainability* will be a crucial guide to inform and assist nations to develop strategies to significantly reduce environmental pressures strengthen their economy create jobs and reduce poverty I commend the team from The Natural Edge Project and their partners for undertaking to develop a response to *Our Common Future* to mark its 20th anniversary Dr Gro Brundtland *Sequel to The Natural Advantage of Nations* Published with The Natural Edge Project

**Restoring Natural Capital** James Aronson, Suzanne J. Milton, James N. Blignaut, 2012-09-26 How can environmental degradation be stopped How can it be reversed And how can the damage already done be repaired The

authors of this volume argue that a two pronged approach is needed reducing demand for ecosystem goods and services and better management of them coupled with an increase in supply through environmental restoration Restoring Natural Capital brings together economists and ecologists theoreticians practitioners policy makers and scientists from the developed and developing worlds to consider the costs and benefits of repairing ecosystem goods and services in natural and socioecological systems It examines the business and practice of restoring natural capital and seeks to establish common ground between economists and ecologists with respect to the restoration of degraded ecosystems and landscapes and the still broader task of restoring natural capital The book focuses on developing strategies that can achieve the best outcomes in the shortest amount of time as it considers conceptual and theoretical issues from both an economic and ecological perspective examines specific strategies to foster the restoration of natural capital and offers a synthesis and a vision of the way forward Nineteen case studies from around the world illustrate challenges and achievements in setting targets refining approaches to finding and implementing restoration projects and using restoration of natural capital as an economic opportunity Throughout contributors make the case that the restoration of natural capital requires close collaboration among scientists from across disciplines as well as local people and when successfully executed represents a practical realistic and essential tool for achieving lasting sustainable development

**Ways to Live in Harmony with Nature** Kamaljit K Sangha,2018-10-01 Have you ever wondered how you can maintain your current lifestyle but not exhaust our planet s resources In modern times many of us have environmental knowledge but we lack an understanding of how to apply that knowledge to our everyday lives Bridging this gap is what has motivated ecological economist Dr Kamaljit Sangha to write this book Dr Sangha examines how people can make a difference to the environment by proposing little actions at the household scale that can contribute towards saving our planet This book examines how to Minimise the gap between scientific knowledge and public awareness Reduce the impact of our actions on our natural environment Maintain our earth s natural resources Be happier and healthier by recognising our reliance on Mother Nature and re-establishing our connections with nature Dr Sangha believes there are a few very easy steps that everyone whether they reside in the city or the country can take to save money their mental and physical health and ultimately our planet
