Observation Medicine Sharon E. Mace, 2017-03-16 This guide to successful practices in observation medicine covers both clinical and administrative aspects for a multinational audience

Measurement and Analysis in Transforming Healthcare Delivery Harry C. Sax, 2016-12-08 This volume is complementary to Volume 1 Quantitative Approaches in Health Systems Engineering which provides in depth analysis of the statistical and quantitative aspects of Health Systems Engineering Volume 2 Practical Applications to Engage and Align Providers and Consumers builds upon these concepts with the integration of additional economic performance and quality measures Stressing the importance of changes in the economics of health care financing it will serve as a resource for not only leaders of organizations but also providers who will be practicing a different type of medicine from that of which they were trained After defining the challenges the authors will quantify and define funds flows and various margins necessary for viability how providers will be measured and rewarded for quality and the importance of accurate dashboard of physician performance Types of payment systems including capitation ACOs risk contracts and hybrid forms of fee for service will be defined and their relative advantages discussed Lessons from other countries that provide high quality care at a lower cost will be examined for applicability to our challenges Finally experts in leadership will focus on influencing behavior to achieve results while remembering that healthcare is about the patient This textbook will serve as a useful resource for clinicians healthcare executives governmental agencies and emerging leaders in organizations

Forecasting Informatics Competencies for Nurses in the Future of Connected Health Judy Murphy, William Goossen, 2017-01-15 Nursing informatics has a long history of focusing on information management and nurses have a long history of describing their computer use However based on the technical advances and through the ongoing and consistent changes in healthcare today we are now challenged to look to the future and help determine what nurses and patients consumers will need going forward This book presents the proceedings of the Post Conference to the 13th International Conference on Nursing Informatics held in Geneva Switzerland in June 2016 The theme of the Post Conference is Forecasting Informatics Competencies for Nurses in the Future of Connected Health This book includes 25 chapters written as part of the Post Conference a result of the collaboration among nursing informatics experts from research education and practice settings from 18 countries and from varying levels of

expertise those beginning to forge new frontiers in connected health and those who helped form the discipline The book content will help forecast and define the informatics competencies for nurses in practice and as such it will also help outline the requirements for informatics training in nursing programs around the world The content will aid in shaping the nursing practice that will exist in our future of connected health when practice and technology will be inextricably intertwined

Managing Care: A Shared Responsibility Joseph L. Verheijde, 2006-01-07 This book traces the growth of managed care as a mechanism for curbing excessive growth in health costs and the controversies that have risen around for profit health care Also examined are decentralization in US health care and the absence of comprehensive health care planning access rules and minimum health care benefit standards Finally the author proposes a framework for improving access to quality affordable health care in a competitive market environment

The Ethos of Medicine in Postmodern America Arnold R. Eiser, 2013-12-24 Has postmodern American culture so altered the terrain of medical care that moral confusion and deflated morale multiply faster than both technological advancements and ethical resolutions The Ethos of Medicine in Postmodern America is an attempt to examine this question with reference to the cultural touchstones of our postmodern era consumerism computerization corporatization and destruction of meta narratives The cultural insights of postmodern thinkers such as Foucault Deleuze and Guattari Lyotard Baudrillard Bauman and Levinas help elucidate the changes in healthcare delivery that are occurring early in the twenty first century Although only Foucault among this group actually focused his critique on medical care itself their combined analysis provides a valuable perspective for gaining understanding of contemporary changes in healthcare delivery It is often difficult to envision what is happening in the psychosocial cultural dynamic of an epoch as you experience it Therefore it is useful to have a technique for refracting those observations through the lens of another system of thought The prism of postmodern thought offers such a device with which to view the eclipse of changing medical practice Any professional practice is always thoroughly embedded in the social and cultural matrix of its society and the medical profession in America is no exception In drawing upon the insights of key Continental thinkers such and American scholars this book does not necessarily endorse the views of postmodernism but trusts that much can be learned from their insight Furthermore its analysis is informed by empirical information from health services research and the sociology of medicine Arnold R Eiser develops a new understanding of healthcare delivery in the twenty first century and suggests positive developments that might be nurtured to avoid the barren Silicon Cage of corporate bureaucratized medical practice Central to this analysis are current healthcare issues such as the patient centered medical home clinical practice guidelines and electronic health records This interdisciplinary examination reveals insights valuable to anyone working in postmodern thought medical sociology bioethics or health services research
