COMMENTS

NEIL: Well, it doesn't look like you left the oil in too long, but you didn't tell us how many miles were on this oil. Universal averages show normal levels of wear for this type of engine after ~5,500 miles of oil use. From what we can see here, this engine looks great. We were expecting high levels of metals/silicon from the normal break-in process, but most wear metals are at or below average. The TBN at 4.5 shows lots of active additive left. 10,000 miles seems possible on future oil changes, but maybe check back in about 6,000 miles first to see how metals look then.
