Development of executive function during childhood Yusuke Moriguchi, Philip D Zelazo, Nicolas Chevalier, 2016-04-01 Executive function refers to the goal oriented regulation of one's own thoughts, actions, and emotions. Its importance is attested by its contribution to the development of other cognitive skills, e.g. theory of mind, social abilities, e.g. peer interactions, and academic achievement, e.g. mathematics, and by the consequences of deficits in executive function which are observed in a wide range of developmental disorders such as attention deficit hyperactivity disorder and autism. Over the last decade, there have been growing interest in the development of executive function, and an expanding body of research has shown that executive function develops rapidly during the preschool years, with adult level performance being achieved during adolescence or later. This recent work, together with experimental research showing the effects of interventions targeting executive function, has yielded important insights into the neurocognitive processes underlying executive function. Given the complexity of the construct of executive function, however, and the multiplicity of underlying processes, there are often inconsistencies in the way that executive function is defined and studied. This inconsistency has hampered communication among researchers from various fields. This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function. Researchers using various methods, including behavioral experiments, neuroimaging, eye tracking, computer simulation, observational methods, and questionnaires, are encouraged to contribute original empirical research. In addition to original empirical articles, theoretical reviews and opinion perspective articles on promising future directions are welcome. We hope that researchers from different areas, such as developmental psychology, educational psychology, experimental psychology, neuropsychology, neuroscience, psychiatry, computational science, etc., will be represented in the Research Topic.

Measuring Landscapes Andre Botequilha Leitao, Joseph Miller, Jack Ahern, Kevin McGarigal, 2012-09-26 This practical handbook bridges the gap between those scientists who study landscapes and the planners and conservationists who must then decide how best to preserve and build environmentally sound habitats. Until now, only a small portion of the relevant science has influenced the decision-making arenas where the future of our landscapes is debated and decided. The authors explain specific tools and concepts to measure a landscape's structure, form, and change over time. Metrics studied include patch richness, class area, proportion, patch number, and density, mean patch size, shape, radius of gyration, contagion, edge contrast, nearest neighbor distance, and proximity. These measures will help planners and conservationists make better land use decisions for the future.

Missionary Enchantment in South Asia, 16th-18th Centuries Ines G. Zupanov, 2025-10-01 Max Weber's classical notion of enchantment serves in this book to highlight the clash and rewiring of ethical and cosmological codes in European and Indian early modern cultural encounters from the 16th century onward. Since Portuguese imperialism was unable to justify itself without invoking otherworldly intervention, Catholic missionaries provided the vocabulary and narrative of global salvation. Each chapter in this volume explores a range of enchantment techniques used by missionaries encompassing historical prose, poetry, images, and translations woven through with emotions and wrapped in illocutionary force. Catholic missionaries in India wrote from and about the soft belly of tropical colonialism with certainty about the triumph of Christianity. Understanding the subterranean bond between history and fiction is at the heart of this book. *Wie man unsere Zivilisation wieder aufbaut, wenn man sich mit seiner Zeitmaschine verfahren hat* Ryan North, 2020-11-17.
