**The Statesman's Yearbook 2024** Palgrave Macmillan, 2024-01-03 Now in its 160th edition The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions **Wealth and the Built Environment** Emilio José García, Brenda Vale, 2025-04-26 The need to address global environmental problems is urgent The United Nations 17 Sustainable Development Goals SDGs cover a wide range of global concerns from poverty hunger and gender equity to justice and climate action Concerningly the SDGs still have faith in economic growth and technological innovation as the means of fixing all global concerns including climate change What is not questioned is whether solving development and sustainability problems through economic growth for the accumulation of wealth for the few has led to many of the current unequal development and environmental problems If unfair growth and wealth accumulation have been part of the problem how can they be part of the solution The problem with the SDGs is that their fulfilment relies on wealth creation without the fundamental concomitant of wealth redistribution The one common driver of change affecting both sustainability and development that has not been included in the SDGs is wealth the central focus of this book SDG 11 sustainable cities and communities presents a further paradox unless the issue of wealth and its fair distribution is grasped Cities are the places where wealth is generated but are also places where only a minority are wealthy The wealth generated in cities leads to higher consumption of resources higher emissions and higher disparities and inequalities However any version of a sustainable future will happen in the built environment made according to current ideals like the present belief in overcoming all humanity's problems by becoming wealthier A fundamental assumption of this book is that the first step toward a fairer habitat that can be maintained with the resources available is only possible if we stop designing cities and buildings as if everyone were wealthy or had to become wealthy To achieve this goal it is essential to identify and raise awareness of the impact of wealth to question how the myths about the advantages of wealth were built where they come from what shape they take in the built environment and who benefits from them *How to Succeed at School* Wendy Berliner, Judith Judd, 2019-11-20 This book shines a light on the best research into learning and the brain development that makes it all possible Written by two distinguished education journalists it provides an invaluable guide to the latest information for teachers and parents seeking to help children to make the best use of their potential and steer a true course through an often confused noisy and crowded learning landscape where ideas compete and nothing can seem clear Summarising the most up to date and significant research in a jargon free and understandable way this book provides readers with simple and clear access to knowledge and information about what really helps children learn and flourish Whether you're a teacher who wants to encourage the right kind of parental support or a parent who wants to do the best for your child this is an essential read Drawing on expert analysis interviews and example studies the chapters tackle common

misconceptions and myths and explore crucial topics including The use of neuroscience in education The role of parents and how all parents can help their children learn What works in the classroom and the best ways of teaching a child The first of its kind this seminal text is a unique resource for parents carers primary and secondary teachers student teachers policymakers and anyone interested in the development of children and how they learn

**Our Social World** Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell Korgen, 2018-11-29 Our Social World Introduction to Sociology inspires students to develop their sociological imaginations to see the world and personal events from a new perspective and to confront sociological issues on a day to day basis Organized around the Social World model a conceptual framework that demonstrates the relationships among individuals the micro level organizations institutions and subcultures the meso level and societies and global structures the macro level Jeanne H Ballantine Keith A Roberts and Kathleen Odell Korgen use this framework to help students develop the practice of using three levels of analysis and to view sociology as an integrated whole rather than a set of discrete subjects The Seventh Edition includes new coverage of climate change the influence of robots and artificial intelligence on workers race relations in the Trump era issues related to transgender identity and gender fluidity sexual harassment in the workplace and the MeToo movement declining marriage rates the impact of tracking for students at all academic achievement levels smoking as an example of health and inequality in the US gun violence and the student movement to control access to guns social media and Russian interference in the 2016 election
