Multimodality And Active Listenership A Corpus Approach Dawn Knight:

Multimodality and Active Listenership Dawn Knight, 2011-10-13 Current corpora are invaluable resources for generating accurate and objective analyses of patterns of language use. However, spoken corpora are effectively mono-modal, presenting data in the same physical medium: text. The reality of a discourse situation is lost in its representation as text. Using multimodal data sets when conducting corpus-based pragmatic analyses is one solution. This book looks at multimodal corpora in some depth, using backchanneling as the conversational feature to be analysed. It provides a bottom-up investigation of the issues and challenges faced at every stage of multimodal corpus construction and analysis, as well as providing an in-depth linguistic analysis of a cross-section of multimodal corpus data. The collaborative and co-operative nature of backchannels is highlighted in this book, and an adapted pragmatic functional linguistic coding matrix for the characterisation of backchanneling phenomena is presented. Dawn Knight also looks at possible directions in the construction and use of multimodal corpus linguistics. **Variation in Time and Space** Anna Čermáková, Markéta Malá, 2020-12-07

Variation in Time and Space Observing the World through Corpora is a collection of articles that address the theme of linguistic variation in English in its broadest sense. Current research in English language presented in the book explores a fascinating number of topics whose unifying element is the corpus linguistic methodology. Part I of this volume, **Meaning in Time and Space**, introduces the two dimensions of variation: time and space, relating them to the negotiation of meaning in discourse and questions of intertextuality. Part II, **Variation in Time**, approaches the English language from a diachronic point of view; the time periods covered vary considerably, ranging from the 16th century up to the present day, so do the genres explored. Part III, **Variation in Space**, focuses on global varieties of English and includes a contrastive point of view. The range of topics is again broad, from specific lexico-grammatical structures to the variation in academic English, combining the regional and genre dimensions of variation. This is a timely volume that shows the breadth and depth in current corpus-based research of English. **Corpora and Discourse Studies** Anthony McEnery, Paul Baker, 2015-07-21

This edited collection brings together contemporary research that uses corpus linguistics to carry out discourse analysis. The book takes an inclusive view of the meaning of discourse, covering different text types or modes of language, including discourse as both social practice and as ideology or representation. **Representation of the British Suffrage Movement** Kat Gupta, 2015-11-19 Focussing on *The Times*, this monograph uses corpus linguistics to examine how suffrage campaigners' different ideologies were conflated in the newspaper over a crucial time period for the movement, 1908 to 1914, leading up to the Representation of the People Act in 1918. Looking particularly at representations of suffrage campaigners' support of or opposition to military action, Gupta uses a range of methodological approaches drawn from corpus linguistics, discourse analysis and CDA. These include collocation analysis, examination of consistent significant collocates and van Leeuwen's taxonomy of social actors. The book offers an innovative insight into contemporary public understanding of the suffrage campaign, with implications for

researchers examining large complex protest movements Keywords in the Press: The New Labour Years Lesley Jeffries, Brian Walker, 2017-11-16 Building on Raymond Williams iconic Keywords released in 1975 Jeffries and Walker show how some pivotal words significantly increased in use and evolved in meaning during the years of the New Labour project Focussing on print news media this book establishes a set of socio political keywords for the Blair Years and demonstrates how their evolving meanings are indicative of the ideological landscape in Britain at that time and the extent to which the cultural hegemony of the New Labour project influenced the language of the commentariat Combining corpus linguistic approaches with critical stylistics the authors conduct an analysis of two newspaper corpora using computational tools Looking closely at textually constructed meanings within the data their investigation of the keywords has a qualitative focus and sets out a clear methodology for combining corpus approaches with systematic co textual analysis **Children's**

Literature and Childhood Discourses Anna Cermakova, Michaela Mahlberg, 2024-04-04 Children's literature shapes what children learn about the world It reflects social values norms and stereotypes This book offers fresh insights into some of the key issues in fiction for children from the representation of gender to embodied cognition and the translation of children's literature Connecting classic children's texts such as *Alice in Wonderland* with contemporary fiction including *Murder Most Unladylike* the book innovatively brings together perspectives from corpus linguistics stylistics cognitive linguistics literary and cultural studies and human geography It explores approaches to experiencing fiction as well as methods for the study of literary texts Childhood discourses are investigated through the materiality of texts the spaces that literature takes up in libraries the cultural history of fiction moulded through performances as well as reading environments that shape childhood experiences such as fashion and urban spaces *Children's Literature and Childhood Discourses* emphasizes the crucial link between fictional stories and real life **MLA International Bibliography of Books and Articles on the Modern**

Languages and Literatures Modern Language Association of America, 2008 Vols for 1969 include ACTFL annual bibliography of books and articles on pedagogy in foreign languages 1969
