

STARTING/STOPPING INSTRUCTIONS

WARNING: To avoid serious personal injury, always remove the vacuum bag prior to refueling the unit. The bag may become a fire hazard when saturated with petrol.

STARTING INSTRUCTIONS

- Mix petrol (gasoline) with oil. Fill petrol tank with petrol/oil mixture. See **Oil and Petrol Mixing Instructions**.
NOTE: Before you start the unit, put on the shoulder harness and adjust it, but don't clip it to the support fitting.
NOTE: The throttle control will remain in the position it's placed until moved. Fast position is to the right. Also, there is no need to turn the unit on.
 - Put the Ignition Switch in the ON (I) position.
 - Set the blower/vacuum mode change-over lever to the up position (Blower Mode). See Operating as a Blower.
 - Fully press and release primer bulb slowly 10 times. Petrol should be felt and visible in the bulb (Fig. 11). If petrol hasn't entered the bulb, press until it does.
 - Place the choke lever in Position 1 (Fig. 11).
 - With the unit on the ground, move the throttle lever to the fast position () (Fig. 10).
 - Pull the starter rope out with a **controlled and steady motion** 5 times (Fig. 12).
 - Place the choke lever in Position 2 (Fig. 11).
 - Pull the starter rope out with a **controlled and steady motion** 1 to 5 times to start the engine (Fig. 12).
NOTE: The unit uses Spring Assist Starting™, which significantly reduces the effort required to start the engine. You must pull the starter rope out far enough to hear the engine attempt to start. There is no need to pull the rope briskly— there is no harsh resistance when pulling. Be aware that this starting method is vastly different from (and much easier than) what you may be used to.
 - Allow the engine to warm up for 15 to 30 seconds.
NOTE: Engine may take longer to warm up and reach maximum operating speed at colder temperatures.
NOTE: Unit is properly warmed up when engine accelerates without hesitation.
 - Once the engine is warmed up, place the blue choke lever in Position 3 (Fig. 11). The unit is ready for use.
 - Stand in the operating position and clip the shoulder harness to the support fitting.
- IF... the engine hesitates, return choke lever to Position 2 (Fig. 7) and continue warm up.
- IF... the engine does not start, go back to step 4.
- IF... the engine fails to start after a few attempts, place the blue choke lever in **Position 3** and squeeze the throttle control. Pull the starter rope 3 to 8 times. The engine should start. If not, repeat.
- IF... the engine is already warm, make sure the On/Off Stop control is in the ON position and start the unit with the blue choke lever in **Position 2**. After the unit starts, move the blue choke lever to **Position 3**.

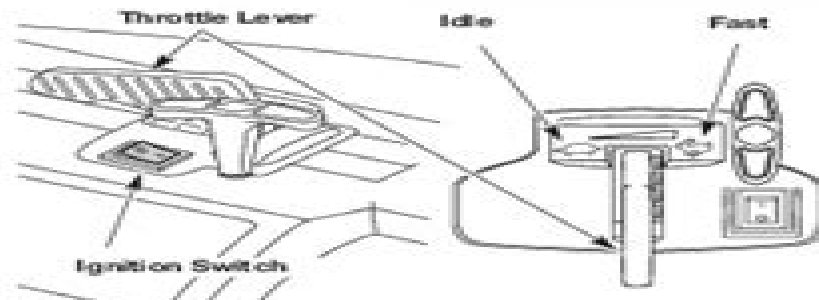

Fig. 10

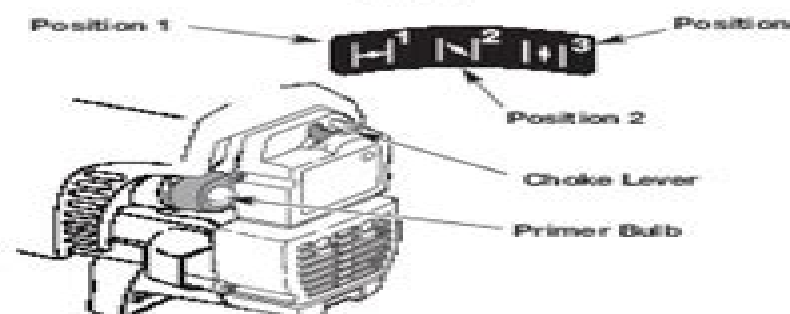

Fig. 11

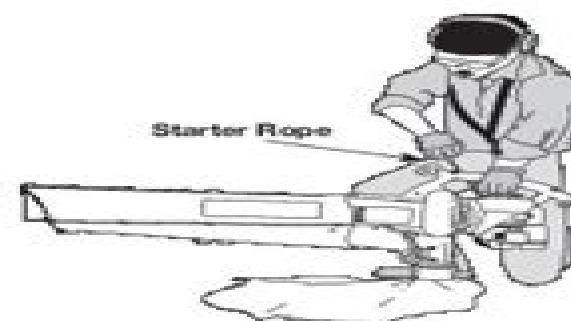

Fig. 12

STOPPING INSTRUCTIONS

- Move the throttle lever to the idle position () (Fig. 10). Allow the engine to cool down by idling.
- Put the ignition switch down in the STOP (O) position (Fig. 10).
