Lingenfelter, 2023-07-03 How can we fix our schools Improve graduation rates in college What works These are questions that make the headlines and vex policy makers practitioners and educational researchers While they strive to improve society there are frequently gulfs of mutual incomprehension among them Academics longing for more influence may wrongly fault irrationality ideology or ignorance for the failure of research to inform policy and practice more powerfully Policy makers and practitioners may doubt that academics can deliver ideas that will reliably yield desirable results This book bridges the divide It argues that unrealistic expectations lead to both unproductive research and impossible standards for evidence based policy and practice and it offers promising ways for evidence to contribute to improvement It analyzes the utility and limitations of the different research methods that have been applied to policy and practice as well as the strengths and weaknesses of educational reform strategies It explains why using evidence for accountability often makes things worse rather than better Paul Lingenfelter offers educational researchers and policy makers a framework for considering such questions as What problems are important and accessible What methods will be fruitful Which help policy makers and practitioners make choices and learn how to improve What information is relevant What knowledge is valid and useful How can policy makers and practitioners establish a more productive division of labor based on their respective capabilities and limitations He cautions against the illusion that straight forward scientific approaches and data can be successfully applied to society s most complex problems While explaining why no single policy or intervention can solve complex problems he concludes that determination measurement analysis and adaptation based on evidence in specific situations can lead to significant improvement This positive even handed introduction to the use of research for problem solving concludes by suggesting emerging practices and approaches that can help scholars practitioners and policy leaders become more successful in reaching their fundamental goals **NAEP 1994 U.S. History Report Card** Alexandra S.
