**Flows and Practices** Lyla Mehta, Bill Derman, 2017-05-19 For the past two decades Integrated Water Resources Management IWRM has been the dominant paradigm in water resources. This book explores how ideas of IWRM are being translated and adapted in Mozambique, South Africa, Tanzania, Uganda, and Zimbabwe. Grounded in social science theory and research, it highlights the importance of politics, history, and culture in shaping water management practices and reform, and demonstrates how Africa has clearly been a laboratory for IWRM. While a new cadre of professionals made IWRM their mission, we show that poor women and men may not have always benefitted. In some cases, IWRM has also offered a distraction from more critical issues such as water and land grabs, privatisation, the negative impacts of water permits, and a range of institutional ambiguities that prevent water allocations to small and poor water users. By critically examining the interpretations and challenges of IWRM, the book contributes to improving water policies and practices and making them more locally appropriate in Africa and beyond.

Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe, such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

*The Political Economy of Energy in Sub-Saharan Africa* Lucky E. Asuelime, Andrew Emmanuel Okem, 2017-09-29 A deepening ecological crisis is rearing its head in sub-Saharan Africa as it faces a myriad of challenges in regards to the development of its energy sector. The 'dirty now and clean up later' approach to the environment has a strong appeal, particularly because it is often thought of as the last place to try to edge in another priority, especially if that priority is perceived by many to be an economic luxury. Asuelime and Okem bring together a team of specialist contributors who investigate to what extent sub-Saharan Africa has displayed foresight or politico-economic integrity. The book shows the state's ability to meet the demands of provision of energy in sub-Saharan Africa has led to heavy investments in infrastructure, transmission, and distribution of energy to the citizens. However, the inefficiencies, corruption, and unhealthy bureaucratic challenges that accompany this have led to urgent problems which will be thoroughly explored in this book. *The Political Economy of Energy in Sub-Saharan Africa* will be of

interest to students and scholars of African Studies Development Studies political science and environment *Policy and Practice Challenges for Equality in Education* Neimann, Theresa, Felix, Jonathan J., Shliakhovchuk, Elena, Hindman, Lynne L., 2021-09-10 Well educated populations are important aspects of any contemporary society as education increases national and global development and the positive expansion of communities to participate actively in civil matters also increases Educational equality is based on the principles of administrative competence and fairness of access and distribution of resources opportunities and treatment which ensures success for every person Ensuring equal access to quality education requires addressing a wide range of persistent inequalities in society and includes a stronger focus on how different forms of inequalities intersect to produce unequal opportunities or outcomes that affect marginalized and vulnerable groups Policy and Practice Challenges for Equality in Education takes a multifaceted look at issues of equality and inequality in education as related to policy practice resource access and distribution As such this book explores the potential practices in education that serve to mitigate and transform unproductive practices which have left societies scarred by social and educational inequalities The chapters provide a critical analysis of the manifestations of inequalities in various educational contexts and discerns how broader social inequalities are informed by education related matters This book is ideal for sociologists administrators instructors policymakers data scientists community leaders practitioners stakeholders researchers academicians and students interested in educational equality and the unique challenges being faced worldwide **The Emerging Policy for Green Economy and Social Development in Limpopo, South Africa** Agnes Musyoki, 2012 This paper evaluates the emerging green economy in South Africa using ideas from the concept of sustainable rural livelihoods which are intimately connected to ecological services many developing countries It finds that African communities and governments are prioritising green economy for job creation poverty alleviation and reducing inequalities while addressing global environmental concerns What remains problematic however is how these objectives are to be achieved The paper argues that one of the key challenges in South Africa is the gap between policy and implementation of sustainable development the Millennium Development Goals and other globally driven initiatives The paper emphasises that green economy policy needs to consider poverty reduction and women s empowerment in order to promote rural sustainable development Publisher description [Stable Isotope Studies of the Water Cycle and Terrestrial Environments](#) A-V.
