The description for this book Linear Inequalities and Related Systems AM 38 Volume 38 will be forthcoming Linear Inequalities and Related Systems Harold W. Kuhn, 1958 Systems of Linear Inequalities A. S. Solodovnikov, 1980-02 This volume describes the relationship between systems of linear inequalities and the geometry of convex polygons examines solution sets for systems of linear inequalities in two and three unknowns extension of the processes introduced to systems in any number of unknowns is quite simple and examines questions of the consistency or inconsistency of such systems Finally it discusses the field of linear programming one of the principal applications of the theory of systems of linear inequalities A proof of the duality theorem of linear programming is presented in the last section **Systems of Linear Inequalities** Aleksandr Samuilovich Solodovnikov, 1979 **Linear Inequalities and Related Systems** H. Since the classic work on inequalities by HARDY LITTLEWOOD and P6LYA in 1934 an enormous amount of effort has been devoted to the sharpening and extension of the classical inequalities to the discovery of new types of inequalities and to the application of inequalities in many parts of analysis As examples let us cite the fields of ordinary and partial differential equations which are dominated by inequalities and variational principles involving functions and their derivatives the many applications of linear inequalities to game theory and mathematical economics which have triggered a renewed interest in convexity and moment space theory and the growing uses of digital computers which have given impetus to a systematic study of error estimates involving much sophisticated matrix theory and operator theory The results presented in the following pages reflect to some extent these ramifications of inequalities into contiguous regions of analysis but to a greater extent our concern is with inequalities in their native habitat Since it is clearly impossible to give a connected account of the burst of analytic activity of the last twenty five years centering about inequalities we have decided to limit our attention to those topics that have particularly delighted and intrigued us and to the study of which we have contributed
