The Complexity of Identity and Interaction in Language Education Nathanael Rudolph, Ali Fuad Selvi, Bedrettin Yazan, 2020-08-07 This book addresses two critical calls pertaining to language education Firstly for attention to be paid to the transdisciplinary nature and complexity of learner identity and interaction in the classroom and secondly for the need to attend to conceptualizations of and approaches to manifestations of inequity in the sociohistorical contexts in which they occur Collectively the chapters envision classrooms and educational institutions as sites both shaping and shaped by larger trans communal negotiations of being and belonging in which individuals affirm and or problematize essentialized and idealized nativeness and community membership The volume comprised of chapters contributed by a diverse array of researcher practitioners living working and or studying around the globe is intended to inform empower and inspire stakeholders in language education to explore potentially reimagine and ultimately critically and practically transform the communities in which they live work and or study

Scholarships, Fellowships and Loans William A. Richards,2001 This annually updated resource provides more than 3 700 sources of education related financial aid and awards at all levels of study *Negotiations of the "new World"* Sabine Selchow,2017 In this book I develop the argument that the omnipresence of the contemporary adjective global is more than a linguistic curiosity I argue it is a political phenomenon and as such a valuable albeit unconventional object of study for scholars outside the linguistics discourse I argue that the omnipresence of the contemporary adjective global constitutes the discursive reproduction of a web of meanings that is best labelled new world As such the omnipresence of the contemporary adjective global constitutes a distinct dimension of the enduring contestation over the construction of the world Given the word's current popularity and unscrutinised existence as well as the loaded nature of the web of meanings new world that it brings out I argue this dimension is not just a minor matter but plays an important hence research worthy role in the contemporary symbolic struggle over the world My conceptualisation of the omnipresence of the contemporary adjective global as the reproduction of a web of meanings new world is grounded in two central insights that arise from my empirical engagement with the adjective global The first of these two insights is the empirically grounded understanding that the contemporary adjective global is closely enmeshed with the talk about different ideas associated with the word globalisation I call this talk globalisation discourse As I demonstrate the contemporary adjective global has come to be used in the sense of outcome of globalisation This makes the adjective a new word What is new about the contemporary global I argue is that it implies ideas that are associated with the word globalisation I develop my argument that the contemporary adjective global is best taken as a new word by building on relevant discussions among lexicographers about when a word is appropriately called new as well as by drawing on a theory of language and meaning according to which language and meaning are not natural and referential but conventional and productive The second central insight that arises from my empirical engagement with the contemporary global and that underlies my conceptualisation of the omnipresence of global as the reproduction of a web of meanings new world refers to the word globalisation It is the insight that all utterances which contain the word globalisation can be seen as constituting a discursive reproduction of an object that is best labelled new world In other words my conceptualisation of the omnipresence of global builds on my understanding that what all uses of the word globalisation have in common despite and in addition to the myriad of meanings that are associated with this word in whichever context it is used is that they imply the proclamation of a new world that came This insight makes what I call globalisation discourse different from existing conceptualisations under this label such as the one by Hay and Smith 2005 Normally the globalisation discourse is conceptualised based on a scholarly preconception of what the word globalisation

refers to such as market integration or the spread of neoliberalism In contrast my suggestion that we understand the uses of the word globalisation as a discursive production of a web of meanings that is best called new world is grounded in an approach that takes the polysemy of the word globalisation seriously In addition it builds on an elaboration of the question how and when the concept s globalisation and the neologism globalisation came to be in the true Foucault 1981 61 i e became socially accepted and normal tools to grasp the world As I discuss in this book developments which have come to be addressed with the word globalisation existed before this neologism became popular at the end of the 1980s and in the course of the 1990s Given that meaning is not inherent in social reality but conventional the question arises why a new word was perceived to be needed and accepted at the end of the 1980s and 1990s i e at that particular moment in time My answer to this question is that this was because the end of the Cold War was perceived to have brought out a new world for which existing conceptual tools were perceived to be inadequate This new world was perceived as having produced a conceptual vacuum This is apparent in assessments such as that of IR theorist James N Rosenau 1990 5 who argued after the end of the Cold War that observers were left without any paradigms or theories that adequately explain the course of events I argue it was this perceived vacuum that opened the discursive door and let the concept s globalisation and the neologism globalisation step in to fill it Consequently the use of the word globalisation can be conceptualised as re producing and filling the conceptual space new world with meaning It is the synthesis of these two insights that allows me to conceptualise the omnipresence of the contemporary adjective global as a distinct phenomenon namely as a discursive re production of a web of meanings called new world This phenomenon I argue in this book is relevant and interesting in two respects

students culinary zone The book also explores the role of the Indonesian language in international corporations in the United Arab Emirates highlighting the importance of cross cultural communication The book aims to provide readers with valuable insights into language policy linguistic landscape analysis and sociolinguistic research It serves as a resource for future researchers in social linguistic and cultural studies and offers society members a deeper understanding of specific areas their language choices and social conditions Ultimately the book serves as an in depth analysis of language policy and its implications in various contexts contributing to the field of language studies and sociolinguistics **Comparative Studies**

In pursuit of societal harmony Ludmilla A. Beckett, Theodorus du Plessis, 2017-12-01 In pursuit of societal harmony Reviewing the experiences and approaches in officially monolingual and officially multilingual countries contains a selection of papers on language legislation that were presented at the International Conference on Language Policy in Multicultural and Multilingual Settings Mandalay Myanmar 8 11 February 2016 The editors both members of the International Academy of Language Law Acad mie internationale de droit linguistique brought together presentations that deal with language legislation and practices in Europe Asia Africa and North America The contributions show that the post communist trend in language policy has been vastly represented by attempts to eliminate the language and even the cultural legacy of the formerly hegemonic nation s in countries emerging after the collapse of the system In doing so officials in these countries tend to link the harmonisation of a diverse society with the idea of homogenising its population and prioritising the cultural legacy of the titular nation In contrast some post colonial countries are more tolerant of the language of their colonisers but consequently do not sufficiently promote the institutionalisation of their indigenous languages Furthermore the absence of visible efforts to follow any legal pattern in this regard often result in a communication gap between government and the various communities
