Chourasia, Kamal Dua, Sachin Kumar Singh, Santosh Kumar Guru, 2025-08-01. Innovative Targeting Strategies in Breast Cancer Therapy is a comprehensive reference addressing the challenge of non-specific drug distribution in the body along with severe toxicity and adverse effects by offering insights into targeted breast cancer treatment. It further educates researchers on formulating and developing novel carriers with target-specific attributes such as targeted liposomes, nanoparticles, micelles, and dendrimers contributing to a more refined approach to breast cancer. This book's content is presented in 12 chapters. The first chapter introduces the reader to the different breast cancer therapies followed by in-depth information on targeting. Recognizing the need for targeted drug delivery in breast cancer treatment, this book presents an encompassing compilation of advanced research and formulation strategies. By focusing on effectively targeting cancer cells, the book mitigates dose-related toxicity associated with cytotoxic drugs, providing a comprehensive resource for improved treatment approaches. Research in oncology, pharmacology, medical researchers, biomedical engineers, and clinical professionals will find this an essential reference. Delves into the intricacies of delivering drugs in cancer precisely to designated sites through molecular recognition. Provides in-depth coverage of existing market formulations, ongoing clinical trials, and intellectual property rights pertaining to targeted breast cancer therapies. Offers researchers up-to-date insights into breast cancer targeting strategies. **British Journal of Cancer**, 1984-07 **Cumulated Index Medicus**, 1991
