Algorithms, Probability, Networks, and Games Christos Zaroliagis, Grammati Pantziou, Spyros

Kontogiannis, 2015-09-07 This Festschrift volume is published in honor of Professor Paul G Spirakis on the occasion of his 60th birthday. It celebrates his significant contributions to computer science as an eminent talented and influential researcher and most visionary thought leader with a great talent in inspiring and guiding young researchers. The book is a reflection of his main research activities in the fields of algorithms, probability, networks, and games and contains a biographical sketch as well as essays and research contributions from close collaborators and former PhD students.

Cambridge International AS and A Level Mathematics: Mechanics Coursebook Jan Dangerfield, Stuart Haring, 2018-03-22

This series has been developed specifically for the Cambridge International AS A Level Mathematics 9709 syllabus to be examined from 2020. Cambridge International AS A Level Mathematics: Mechanics matches the corresponding unit of the syllabus with clear and logical progression through it. It contains materials on topics such as velocity and acceleration, force and motion, friction, connected particles, motion in a straight line, momentum, and work and energy. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations, and worked examples. End of chapter and cross-topic review exercises and Explore tasks encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

Cambridge International AS and A Level Mathematics: Mechanics 2 Coursebook Douglas Quadling, Julian Gilbey, 2016-07-14. Cambridge AS and A Level Mathematics is a revised series to ensure full syllabus coverage. This coursebook has been revised and updated to ensure that it meets the requirements for the Mechanics 2 M2 unit of Cambridge AS and A Level Mathematics 9709. This revised edition adds clarifications to sections on motion of a projectile, equilibrium of a rigid body, and linear motion under a variable force. All of the review questions have been updated to reflect changes in the style of questions asked in the course.

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17. Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research-generated insights have a tangible beneficial impact on what is happening in mathematical classrooms. Combining two discourses—that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice—the book deals with the perennial

question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

On My Own Xueli Wang, 2021-02-18 2020 ASHE Council for the Advancement of Higher Education Programs CAHEP Barbara Townsend Lecture Award 2021 Transfer Champion Catalyst Award from the National Institute for the Study of Transfer Students NISTS 2021 Outstanding Publication Award AERA Division J Publication and Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind to provide a detailed on the ground examination of the difficult paths curricular interpersonal and institutional that students must chart through community college The book follows 1 670 two year college students over four years as they begin STEM programs in the Midwest and documents their educational and life experiences as they moved toward or away from the prospect of transfer to a four year institution Their stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support The students pursued one of four pathways or momentum trajectories linear upward detoured deferred or taking a break The preexisting and lasting disparities in their access to education and financial resources their experiences with teaching and advising and the conundrum between support from and for family among others propelled them onto different trajectories in their quest for transfer As this book makes painfully clear the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes As Xueli Wang argues to cultivate an equitable STEM transfer pathway culturally relevant and responsive supports that are accessible welcoming and validating must be put in place at the institutional level and appeal to the talent motivation and unique needs of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor's degrees and beyond
