Maths Paper 2 Memo November 2014:

A Homology Theory for Smale Spaces Ian F. Putnam, 2014-09-29 The author develops a homology theory for Smale spaces which include the basic sets for an Axiom A diffeomorphism. It is based on two ingredients. The first is an improved version of Bowen's result that every such system is the image of a shift of finite type under a finite-to-one factor map. The second is Krieger's dimension group invariant for shifts of finite type. He proves a Lefschetz formula which relates the number of periodic points of the system for a given period to trace data from the action of the dynamics on the homology groups. The existence of such a theory was proposed by Bowen in the 1970s. **Studies in Intelligence**, 2016 An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test-based accountability as a policy framework in American education from 1970 to 2020. For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment. The theory of change embedded in almost all test-based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize. But even after very clear disappointments no other policy framework has emerged to challenge its hegemony. The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector. As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree. Defense Acquisition Trends, 2015 Jesse Ellman, Andrew P. Hunter, Rhys McCormick, Gregory Sanders, 2016-02-19 This study examines contracting trends at the U.S. Department of Defense (DoD). It relies on empirical analysis of DoD contracting transaction data from the open source Federal Procurement Data System (FPDS). The authors seek to identify and study emergent trends in the contracting data and marry that analysis with discussion of changing goals and methods for the larger acquisition system.

Exploring the Contexts for Early Learning Rory McDowall Clark, 2016-09-01 The concept of readiness for school is attractive to policy makers but many academic researchers and practitioners argue that an early start to formal learning may be misguided. This book introduces readers to an increasing body of evidence which demonstrates that young children need opportunities to learn and develop in environments that support their emotional and cognitive needs offering opportunities to develop autonomy, competence and self-regulation skills. With advice on implementing research findings in practice this book provides clear guidance on how to foster and develop these attributes scaffold steps into new areas of learning and support children in facing new challenges. Chapters cover Policy and discourses Taking account of development Approaches to Early Years Learning The Diversity of Children's Early Experiences Transitions and starting school Where to in the Future Exploring the Contexts for Early Learning will be essential reading for students practitioners policy makers and all those interested in the school readiness agenda.
