Mathscape Buyer Beware Teacher Edition:

Improving Instruction in Rational Numbers and Proportionality Margaret Schwan Smith, Edward A. Silver, Mary Kay Stein, 2005-01-01 Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers. In this book, one of a three-volume set, well-known mathematics educators Margaret Smith, Edward A. Silver, and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction. They focus on ways to engage upper elementary, middle school, and high school students in thinking, reasoning, and problem solving to build their mathematics understanding and proficiency. The content focus of Volume One is rational numbers and proportionality. Using materials that were developed under the NSF-funded COMET Cases of Mathematics to Enhance Teaching program, each volume in the set features cases from urban middle school classrooms with ethnically, racially, and linguistically diverse student populations. Each case illustrates an instructional episode in the classroom of a teacher who is implementing standards-based instruction, the teacher's perspective, including their thoughts and actions as they interact with students, and with key aspects of mathematical content, cognitively challenging mathematics activities that are built around samples of authentic classroom practice, and facilitation chapters to help professional developers teach the cases, including specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher's own practice. As a complete set, this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning.

A Decade of Middle School Mathematics Curriculum Implementation Margaret R. Meyer, Cynthia W. Langrall, 2008-12-01 Associate Editors: Fran Arbaugh, University of Missouri-Columbia; David C. Webb, University of Colorado at Boulder; and Murrell Brewer Hoover, WVSTEM Center, Marshall University. The purpose of this book is to document the work of the Show Me Project, 1997-2007, and to highlight lessons learned about curriculum implementation. Although the Show Me Project was charged with promoting the dissemination and implementation of four distinct comprehensive curriculum programs: Connected Mathematics, Mathematics in Context, MathScape, and MathThematics, most of the lessons learned from this work are not curriculum-specific. Rather, they cut across the four programs and share commonalities with standards-based curriculum reform at any level. We believe that documenting these lessons learned will be one of the legacies of the Show Me Project. We anticipate that the comprehensive nature of this work will attract readers from multiple audiences that include state and district mathematics supervisors, middle grades mathematics teachers, and administrators involved in curriculum reform, as well as mathematics teacher educators. Those about to embark on the review of curriculum materials will appreciate reading about the processes employed by other districts. Readers with interests in a particular curriculum program will be able to trace the curriculum-specific chapters to gain insights into how the design of the curricula relate to professional development, adoption, and implementation issues, and teachers' personal experience using the curriculum materials. Individuals who provide professional

development at the middle grades level will find chapters that they can use for both general and focused discussions Teachers at all stages of implementation will recognize their own experiences in reading and reflecting on the stories of teacher change Mathematics educators will find ideas on how these curricula can be used in the preparation of preservice middle grades teachers
