

3.3.3 STARTING, GEAR SHIFTING, AND TRAVELING

STARTING ENGINE

WARNING

Do not attempt to start the engine by short-circuiting the engine starting circuit. Such a malpractice can cause a serious bodily injury and fire.

CAUTION

- Start the engine only after sitting down in the operator's seat.
- Before starting the engine, move the forward/reverse lever and high/low speed lever (clutch type lift truck) to the neutral positions, and pull the parking brake lever in the direction to the rear of the lift truck.
- Exhaust gas is toxic. When starting engine indoor or in a poorly-ventilated site, take extreme care for ventilation.
- If you lean forward or sideways, or if you are not seated properly while operating the lift truck on an uphill, the system will cut off power to the engine and the lift truck may either down, which can result in an accident or a crash. Maintain the correct right posture while traveling uphill.

1. Move the forward/reverse lever and high/low speed lever to the N (neutral) positions.

REMARK

The engine does not start unless the forward/reverse lever is set in the N (neutral) position.

2. Apply parking brake by pulling the lever to the rear direction of the lift truck. (Parking brake being applied)
