

National Knowledge Commission

Report to the Nation

2006 - 2009

Knowledge is the foundation of a nation's progress. It is the engine of growth, the source of innovation, and the key to sustainable development. The National Knowledge Commission (NKC) was established in 2005 to study and recommend measures for the development of knowledge infrastructure and the promotion of knowledge-based growth in India. This report presents the findings and recommendations of the NKC over its three-year tenure.

The NKC has identified several key areas for focus, including the development of a robust knowledge infrastructure, the promotion of research and innovation, the enhancement of human capital, and the strengthening of governance and institutional frameworks. The Commission has also emphasized the importance of knowledge in the context of India's economic and social challenges, and has proposed a range of policies and programs to address these challenges.

The NKC's recommendations are based on a comprehensive analysis of the current state of knowledge in India, and on a vision of a knowledge-based India in the future. The Commission believes that these recommendations will provide a solid foundation for the nation's long-term growth and development.
