Nations And Nationalism Ernest Gellner:

Nations and Nationalism Ernest Gellner, 2008 Originally published as hbk Malden MA Blackwell Pub 2006 **Nations and Nationalism** Ernest Gellner, 1983 This thoughtful and penetrating book addressed to political scientists sociologists historians and anthropologists interprets nationalism in terms of its social roots which it locates in industrial social organization Professor Gellner asserts here that a society's affluence and economic growth depend on innovation occupational mobility the effectiveness of the mass media universal literacy and an all embracing educational system based on a shared standard idiom These factors taken together govern the relationship between culture and the state Political units that do not conform to the principle one state one culture feel the strain in the form of nationalistic activity Nations and Nationalism Ernest Gellner, 2006 This updated edition of Ernest Gellner's classic exploration of the roots of nationalism includes an extended introduction from John Breuilly tracing the way the field has changed over the past two decades As pertinent today as it was when it was first published in 1983 Argues that nationalism is a product of industrialization The new edition includes references to important work on nationalism published since 1983 Second Edition not available in the USA

An Analysis of Ernest Gellner's Nations and Nationalism Dale Stahl, 2017-07-05 To the dismay of many commentators who had hoped the world was evolving into a more tolerant and multicultural community of nations united under the umbrellas of supranational movements like the European Union the nationalism that was such a potent force in the history of the 20th century has made a comeback in recent years Now more than ever it seems important to understand what it is how it works and why it is so attractive to so many people A fine place to start any such exploration is with Ernest Gellner's seminal *Nations and Nationalism* a ground breaking study that was the first to flesh out the counter intuitive but enormously influential thesis that modern nationalism has little if anything in common with old fashioned patriotism or loyalty to one's homeland Gellner's intensely creative thesis is that the nationalism we know today is actually the product of the 19th century industrial revolution which radically reshaped ancient communities encouraging emigration to cities at the same time as it improved literacy rates and introduced mass education Gellner connected these three elements in an entirely new way contrasting developments to the structures of pre industrial agrarian economies to show why the new nationalism could not have been born in such communities He was also successful in generating a typology of nationalisms in an attempt to explain why some forms flourished while others fizzled out His remarkable ability to produce novel explanations for existing evidence marks out *Nations and Nationalism* as one of the most radical stimulating and enduringly influential works of its day **Nations and Nationalism** Dale J. Stahl, 2017-07-05 Ernest Gellner a Jew who escaped from Czechoslovakia in 1939 after Hitler invaded knew first hand the catastrophic effects of excessive nationalism and he was determined to understand the phenomenon that had shaped so much of 20th century history Nationalism Ernest Gellner, 1997 In this provocative essay finished just before the author's death Gellner explores the subject with which he was most associated

throughout his life that of nationalism He demonstrates how the histories of nationalism and industrialization are crucially linked and drawing together the history of philosophy economics and political thought he contrasts nationalism with religious fundamentalism in a debate that remains of continuing importance to modern politics and international relations

Encounters With Nationalism Ernest Gellner, 1994 The forecast demise of nationalism under the new moral orders of communism and internationalism has proved illusory In the present century to an extent greater perhaps than in all others nationalism has been the dominant force in the affairs of humankind Why should this have been Why is it that a national identity should continue to be the aspiration of almost all peoples without one and at the same time the justification in the process of obtaining securing and expanding it for casting aside every trace and tradition of civility In Encounters with Nationalism Ernest Gellner seeks some answers His approach is to consider first the ideas of the main modern thinkers on the subject from Marx List Malinowski and Carr to Masaryk Heidegger Patocka Hroch Havel and Said He examines the origins subjects and context of their writings their interactions with culture and politics and their influence both on theory and on events The range is wide covering Eastern Western and Islamic societies and includes extensive discussions of the related themes of civil society theocracy communism imperialism capitalism and liberalism Professor Gellner is never less than trenchant He is concerned here not only to understand but to criticize He confronts several powerful and fashionable notions that fuel and or attempt to explain contemporary nationalism among them postcolonialism On the one hand he exposes their incoherence and irresponsibility on the other he places them alongside ideas of real currency Nor does he evade the controversy surrounding the nature of judgement itself the reader will also find here concise and penetrating discussions of relativism pluralism objectivity and the possibility of universal values **The State of the Nation. Ernest Gellner and the Theory of Nationalism** John A. Hall, 2000 The Social Philosophy of Ernest Gellner , 2023-12-28

Nations and Nationalism Philip Spencer, Howard Wollman, 2005 Nationalism is a key area of political theory with a huge amount of literature available This text includes both the core texts in this area and a selection of less mainstream pieces with the aim of engaging readers with contemporary debates which have reconfigured understanding of nationalism **The Ernest Gellner Nationalism Lecture** , 2004 **Ernest Gellner** John A. Hall, 2014-06-10 Ernest Gellner 1925 95 was a multilingual polymath and a public intellectual who set the agenda in the study of nationalism and the sociology of Islam Having grown up in Paris Prague and England he was also one of the last great Jewish thinkers from Central Europe to experience directly the impact of the Holocaust His intellectual trajectory differed from that of similar thinkers both in producing a highly integrated philosophy of modernity and in combining a respect for nationalism with an appreciation of the power of modern science Gellner was a fierce opponent in private as well as in public of such contemporaries as Michael Oakeshott Isaiah Berlin Charles Taylor Noam Chomsky and Edward Said As this definitive biography shows he was passionate in the defense of reason against every form of relativism a battle that his intellectual inheritors continue to this

day *Geography of Hope* Pierre Birnbaum, 2008 In *Geography of Hope* French sociologist and historian Pierre Birnbaum examines the work of some of the prominent Jewish social scientists of the past two centuries in order to analyze their range of responses to the tensions between the Enlightenment call for universalism and the reality of Jewish particularism

Arguing Comparative Politics Alfred C. Stepan, 2001 This volume brings together new and classic articles by one of the leading scholars in comparative politics The articles focus in particular on the nature of contemporary democracy and its prospects The volume begins with a personal analysis of the intellectual and often political reasons why and how Stepan chose to engage in certain critical arguments over the last thirty years The volume is then divided into three sections each with a distinctive theme state and society constructing polities and varieties of democracies The introduction and articles ask whether both for intellectual and political reasons there are strong grounds for questioning both Rawls and Huntington on religion and democracy Riker on federalism and Gellner on multinationalism The volume contains articles on civil society political society economic society the military and a usable state The possibility of multiple and complementary political identities is argued for The incentive systems and political practices of the three macro constitutional frameworks for democratic government parliamentarianism presidentialism and semi presidentialism are compared and contrasted All
