**Communities** Sarah Earle, *Multilingual classroom contexts* Christa van der Walt, Verbra Pfeiffer, 2021-12-01 By far the majority of South African students get their schooling in a second language which means that our classrooms are multilingual. This state of affairs is not exclusive to our country as can be seen in the many academic conferences on multilingual learning and teaching. Terms like translanguaging and biliteracy appear in many articles and books that discuss the role language in education. What makes the multilingual nature of our South African classrooms challenging is the fact that many learners switch from one language of learning and teaching to another at various points in their school career from home language to English or Afrikaans after the foundation phase from one language of learning and teaching to another when they move to new schools high school or tertiary institutions. This book is an attempt to highlight the transitions from home to school from foundation to intermediate phase from primary to high school and from high school to tertiary institutions.

**International Handbook on Education in Southeast Asia** Lorraine Pe Symaco, Martin Hayden, 2021-12-23 This International Handbook provides a detailed account of the education systems of 11 Southeast Asian nations including Brunei Darussalam Cambodia Indonesia Lao People's Democratic Republic Malaysia Myanmar the Philippines Singapore Thailand Timor Leste and Vietnam. It presents a systematic sector by sector explanation of how these national education systems deliver educational services and respond to national and international issues and challenges. With 56 chapters the International Handbook is the region's most comprehensive educational reference source. In the first of its chapters the editors introduce the regional context and draw attention to the distinctive characteristics of each of the 11 systems. Southeast Asia representing 8.5% of the world's population is as dynamic as it is diverse. The International Handbook charts progress and establishes a benchmark for documenting future developments. It also provides a stepping off point for more detailed investigations of decision making processes and outcomes across the 11 national education systems.
