Clinical Cases in Augmentative and Alternative Communication Martine M. Smith, 2023-03-15 Clinical Cases in Augmentative and Alternative Communication provides a concise introduction to the rapidly expanding field of augmentative and alternative communication AAC. It brings together internationally renowned experts in the field to discuss its application and outline key principles of intervention to support communication using AAC. Carefully grounded in evidence-based clinical practice, the book highlights the diversity of potential applications for AAC across a wide range of client groups including children and adults with developmental disabilities as well as adults with acquired impairments. Most of the chapters are structured as case reports following CARE guidelines and highlight key principles for intervention that are grounded in clinical practice. The chapters also include reflections on communication through AAC and the valuable contributions that AAC can make in supporting independence and enhancing quality of life. This accessible book is ideal reading for students, novice clinicians in the fields of speech and language therapy or pathology, and professionals who are new to this area of clinical practice.

Pathological Lives Steve Hinchliffe, Nick Bingham, John Allen, Simon Carter, 2016-12-21. Pandemics, epidemics, and food-borne diseases are a major global challenge. Focusing on the food and farming sector and mobilising social theory as well as empirical enquiry, *Pathological Lives* investigates current approaches to biosecurity and asks how pathological lives can be successfully regulated without making life more dangerous as a result. Uses empirical and social theoretical resources developed in the course of a 40-month research project entitled *Biosecurity borderlands*. Focuses on the food and farming sector where the generation and subsequent transmission of disease has the ability to reach pandemic proportions. Demonstrates the importance of a geographical and spatial analysis, drawing together social, material, and biological approaches as well as national and international examples. The book makes three main conceptual contributions: reconceptualising disease as situated matters, the spatial or topological analysis of situations, and a reformulation of biopolitics. Uniquely brings together conceptual development with empirically and politically informed work on infectious and zoonotic disease to produce a timely and important contribution to both social science and to policy debate.

Digital Blockchain Rishabha Malviya, Shristy Verma, Sonali Sundram, Harshil Shah, 2025-04-21. *Digital Blockchain: Big Data, Artificial Intelligence, and Virtual Reality in Healthcare Ecosystem* is a book that explores the revolutionary impact of blockchain, big data, and artificial intelligence (AI) on the pharmaceutical and healthcare sectors. The book discusses AI, big data, and their applications in drug research, clinical trials, regulatory compliance, and post-marketing surveillance. The book also discusses education and training in smart pharma, demonstrating the potential of AI, big data, and machine learning to improve workforce capacities. The book discusses intellectual property and data privacy issues, the legislative framework for AI adoption, ethical considerations, and future trends in AI-enabled drug research, manufacturing, and healthcare innovation. It is a valuable resource for healthcare professionals, industrial experts, and academicians, offering theoretical and practical

insights *Cognitive Modeling in Perception and Memory* J G W Raaijmakers, Robert Goldstone, Mark Steyvers, Amy Criss, Robert Nosofsky, 2015-02-11 The work of Richard M Shiffrin has highly impacted the field of cognitive science and current developments within perception and memory have been influenced by his ideas In this volume several key figures in the field will comment on these developments and put them in a wider perspective Although many theories and models have been presented in recent years for various aspects of human cognition there have not been many comparative evaluations that focus on how these models have really advanced our understanding of the underlying mechanisms This volume will be a valuable source of information for both cognitive scientists working in the field and researchers and students looking for a clear accessible presentation of the key problems in cognitive science Highlighted sections include attention and perception memory functions and processes knowledge representation and semantics modelling approaches and applications *Times of History, Times of Nature* Anders Ekström, Staffan Bergwik, 2022-02-11 As climate change becomes an increasingly important part of public discourse the relationship between time in nature and history is changing Nature can no longer be considered a slow and immobile background to human history and the future can no longer be viewed as open and detached from the past Times of History Times of Nature engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts Focusing on the history of knowledge media theory and environmental humanities this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change Policy Analytics, Modelling, and Informatics J Ramon Gil-Garcia, Theresa A.
