  - b) Managerial accounting may deviate from generally accepted accounting principles (GAAP).
  - c) Managerial accounting may present more detailed information.
  - d) Managerial accounting may present more nonmonetary information.
  - e) Managerial accounting places more emphasis on the future.
4. Examples of nonmonetary information that might appear in managerial accounting reports include: the quantity of material consumed in production, the number of hours worked by the office staff, and the number of product defects.
5. Total variable costs change in proportion to business activity while total fixed costs do not change.
6. Salaries of the home appliance sales force would be a controllable cost for the manager of the home appliance department at a Sears store. Depreciation related to the department store building would be a noncontrollable cost.
