Multiple Choice

- 4-1 For the equation $Y = a + bX$, the objective of regression analysis is to
- estimate the parameters a and b .
 - estimate the variables Y and X .
 - fit a straight line through the data scatter in such a way that the sum of the squared errors is minimized.
 - both a and c
 - all of the above
- 4-2 In a linear regression equation of the form $Y = a + bX$, the slope parameter b shows
- $\Delta X / \Delta Y$.
 - $\Delta Y / \Delta X$.
 - $\Delta Y / \Delta b$.
 - $\Delta X / \Delta b$.
 - none of the above
- 4-3 In a linear regression equation of the form $Y = a + bX$, the intercept parameter a shows
- the value of X when Y is zero.
 - the value of Y when X is zero.
 - the amount that Y changes when X changes by one unit.
 - the amount that X changes when Y changes by one unit.
- 4-4 In a regression equation, the _____ captures the effects of factors that might influence the dependent variable but aren't used as explanatory variables.
- intercept
 - slope parameter
 - R -square
 - random error term
- 4-5 The sample regression line
- shows the actual (or true) relation between the dependent and independent variables.

Managerial Economics 11th Edition Foundations:

Handbook of Research on Nonprofit Economics and Management Bruce Alan Seaman, Dennis R. Young, 2010 Nonprofit organizations are arguably the fastest growing and most dynamic part of modern market economies in democratic countries. This book explores the frontiers of knowledge at the intersection of economics and the management of these entities. The authors review the role, structure, and behavior of private nonprofit organizations as economic units and their participation in markets and systems of public service delivery; assess the implications of this knowledge for the efficient management of nonprofit organizations and the formulation of effective public policy; and identify cutting edge questions for future research. Chapters address five broad categories of scholarship: development and management of the diverse economic resources supporting nonprofit organizations; market behavior of nonprofits; strategic economic decision making; evaluation and performance of them; and impacts and implications of public policies affecting nonprofit organizations. Topics include income diversification and crowd out among income sources; paid and volunteer labor markets; competition and collaboration among nonprofits and for profits; pricing and diversification of nonprofit products and services; performance measurement and regulation; contracting, franchising, and federation practices; and government taxation and funding. The book will help nonprofit scholars identify new areas of productive research; help practicing managers understand the underlying economics of their decision making; and offer teachers and students a concise and penetrating view of key economic dimensions to managing nonprofit organizations.

Economic Analysis and Law Christopher E.S. Warburton, 2020-05-20 A comprehensive presentation of the use of economics in judicial decisions, the book is structured to provide all the foundational concepts that are important for the application of economics to the development and interpretation of statutes that emanate from economic conditions. The diversity of the economic field defines the scope of the book and its relevance to the study of law and rule adjudication. Beyond the positive dimensions of law and economics, the book evaluates the normative aspects of law and economics when laws are imprecise and markets are inefficient. The ethical scope of transactions and rule adjudication are further considered in the context of professional ethics and the rationale for ethical considerations in the practice of law and economics. It presents a unique analysis of law, finance, and economics by taking a look at the intricate quantitative requirements that are essential for scientific knowledge in the courtroom and the international dimensions of the practice of law and economics beyond municipal frontiers. It alerts entrepreneurs to risk exposures in the global economy and provides foundational information for readers who are also interested in international law and economics and the essence and interpretations of international conventions appertaining to money expropriation, the environment, and investments in international financial markets. This book is a useful reference for both undergraduate and graduate students who are interested in law and economics, forensic economics, corporate white collar crime, and legal studies. It is also valuable for certificate programs for paralegals who wish to have a basic understanding of economic and financial concepts.
