Theories of Change in Reality Andrew Koleros, Marie-Hélène Adrien, Tony Tyrrell, 2024-06-07 For over 50 years evaluators have used theories of change to articulate the causal logic underpinning how an intervention is intended to bring about a desired change From its origins in programme evaluation the approach has been adopted more widely for purposes from program design to program management As theories of change continue to be used for multiple purposes it is an opportune moment for the evaluation community where the approach originated to provide their perspective on the strengths and limitations of the approach and its future directions To provide these perspectives we asked nearly 30 of the world's leading evaluators and programme theorists to provide a short essay on the past present and future of theories of change This book presents their insights organized into five main themes the use of theories of change in broader public policy contexts using theories of change to establish causality developing theories of change reflective of multiple stakeholder perspectives using theories of change to understand wider societal change processes and applying theories of change approaches for multiple purposes By sharing these diverse perspectives the book aims to both provide evaluators and emerging programme theorists with critical perspectives to inform future practice The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict *Corrupted* takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and

lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Transcending Equality, Diversity and Inclusion at Work Marguerite L Weber,Hugo Gaggiotti,2024-06-07 The book reflects on ways of transcending Equality Diversity and Inclusion EDI by establishing a dialogue between the professional experience of the authors and experts from academia and practitioners from financial services and executive search The book emphasises the link and impact between what is taught and what is learned about EDI and how this reflects on later choices in career and workplace status The book offers a critical and global perspective emphasizing the multilocality and intersectionality dimension of diversity and unpicks key insights from different conceptualizations like class gender and postcolonialism and their relationship with the current paradigm of diversity and how people identify and communicate With an extensive collection of testimonies and invitations for reflection the book doesn't limit the analysis to the influences of historical power relations in the workplace but investigates at what stage multicultural power structures start developing a compulsory inclination to create differences and how this can influence hiring decision making and management in the workplace In the book academics and practitioners provide illumination and insights gleaned from their own personal experiences and perspectives Whilst the research targeted financial services and executive search the book's findings will appeal globally to individuals of all age groups regardless of educational status seniority or in which industry they are employed particularly those who are aware of how each one expresses similarity and differences sometimes in not obvious ways
