Crane personnel must verify that method used to fasten or restrain crane to foundation, barge, ship or floating platform is strong enough under all operating conditions, to prevent crane from tipping or falling off barge.

Manufacturer does not permit use of a hook crane on a barge, ship or floating platform.

PEDESTAL MOUNTED CRANE

WARNING **Overload Hazard!**

A pedestal-mounted crane will not tip or indicate to operator that crane's capacity has been exceeded. When capacity of a pedestal-mounted crane is exceeded, complete bearing, track rollers, or equipment, or other structural components may break, before load lines fail causing crane to separate from pedestal.

For this reason, great care must be taken to operate a pedestal-mounted crane within its rated capacity.

Crane planning is required before a crane can be operated on a barge. Crane user must verify that barge is capable of holding crane for another dynamic to maximum structural capacities or capacity limits. If capacities crane for another dynamic conditions are exceeded, crane's capacity may be exceeded. Therefore, complete bearing, track rollers (if equipped), or other structural components may break, causing crane to separate from pedestal.
