Power, Culture, and Family-School Relations Jen Stacy, 2025-01-30 *Power Culture and Family School Relations: Towards Culturally Sustaining Practices* explores the extent to which common practices in school-based family outreach advance equity or sustain the status quo in power and cultural relations. Using a rich ethnographic account of a school-based family literacy program in Nebraska, the book unfolds the daily cultural practices of the program so that readers may visualize and contemplate how and if the program serves newcomer and refugee families within the unique context of the New Latine Diaspora. The author draws upon critical theory to showcase how neoliberal and deficit ideologies are at play throughout the different aspects of the program, the influence these ideologies have on the participants, and the tactics used by the caregivers to resist and change the programmatic structures and curriculum to meet their needs. As such, the book invites educators, administrators, and scholars into the nebulous and difficult conversation about how schools, paradoxical entities that often colonize but prospectively liberate, must not just rethink how they work with parents and caregivers but rather dismantle traditional cultural practices that seek to assimilate minoritized families. Showcasing the power of ethnography as a tool which can be used to support educators and scholars to understand cultural elements of family outreach programs on a semiotic level and how transforming these semiotic building blocks can lead to equitable relationships, it will appeal to scholars and researchers with interests in adult education, social foundations of education, critical ethnography, multilingual Adult Basic Education, and family outreach.

Teaching Students to Drive Their Learning Douglas Fisher, Nancy Frey, Sarah Ortega, John Hattie, 2023-04-15 High levels of engagement it's not an impossible

dream But to attain it we need to focus on what galvanizes learning and ensure we are offering the tools and mindsets with which students can lean in In this playbook an ace team of educators give us the goods to guide self starting learners Nine modules show us how to Coherent standards success criteria tasks and goals so students can travel clear pathways Offer tools that allow learners to recognize the gap between their current performance and the expected performance and select strategies to close that gap Talk with students about engagement as a continuum and that there are actions they can take to heighten their buy in to any endeavor Stress test our lesson plans to ensure students can discuss debate create and problem solve around highly relevant content Use lots of low stakes assessment and feedback routines to develop effective collaboration that doesn't depend on us Our job as teachers is to guide learning experiences that build knowledge and self efficacy But from there we need to stay on the sidelines and let students play Only then will they develop the muscle to persevere the strategic actions to excel and the confidence to make our curriculum the springboard of their own dreams and goals
