## June 2013 S1 Mark Scheme:

**Cerambycidae of the World** Qiao Wang, 2017-01-06 Wang has gathered contributions from an impressive cohort of the world's most respected experts on longhorned beetles. Chapters review both basics of cerambycid taxonomy, morphology and behavior, feeding, reproduction and chemical ecology as well as more applied concerns such as laboratory rearing, pest control and bio security. Overall, this volume is a valuable contribution to the literature as a one stop shop for readers seeking a comprehensive overview of longhorned beetles. It represents a tremendous effort on the part of Wang and the authors and has resulted in a much needed update to the literature. This volume is the only work of its kind available at this time and is a valuable addition to the library of any scientist studying wood boring beetles. Ann M Ray Biology Xavier University Cincinnati Ohio in The Quarterly Review of Biology Volume 94 2019. There are more than 36 000 described species in the family Cerambycidae in the world. With the significant increase of international trade in the recent decades, many cerambycid species have become major plant pests outside their natural distribution range, causing serious environmental problems at great cost. Cerambycid pests of field, vine and tree crops and of forest and urban trees cost billions of dollars in production losses, damage to landscapes and management expenditures worldwide. Cerambycidae of the World: Biology and Pest Management is the first comprehensive text dealing with all aspects of cerambycid beetles in a global context. It presents our current knowledge on the biology, classification, ecology, plant disease transmission and biological, cultural and chemical control tactics, including biosecurity measures from across the world. Written by a team of global experts, this book provides an entrance to the scientific literature on Cerambycidae for scientists in research institutions, primary industries and universities and will serve as an essential reference for agricultural and quarantine professionals in governmental departments throughout the world.

**Them and Us** Philippe Legrain, 2020-10-15 Winner of the Diversity Inclusion and Equality Award at the Business Book Awards 2021. Underpinned by scholarship, entertaining. Legrain's book fizzles with practical ideas. The Economist: The beauty of diversity is that innovation often comes about by serendipity. As Scott Page observed one day in 1904 at the World Fair in St Louis, the ice cream vendor ran out of cups. Ernest Hami, a Syrian waffle vendor in the booth next door, rolled up some waffles to make cones, and the rest is history. Filled with data, anecdotes and optimism, Them and Us is an endorsement of cultural differences at a time of acute national introspection. By every measure, from productivity to new perspectives, immigrants bring something beneficial to society. If patriotism means wanting the best for your country, we should be welcoming immigrants with open arms.
