Introduction

MKS Integrity provides a test execution framework that allows you to automate your test execution environment by integrating MKS Integrity test management functionality with an external testing tool. Using an adapter, you can use your third party testing tool to run test cases and have the results automatically sent back to MKS Integrity. The results can then be viewed and edited through the MKS Integrity Client.

This guide describes the basic steps for creating the adapter and integrating MKS Integrity with a third party testing tool. The information is intended to assist developers who are creating adapters and system administrators responsible for installing and configuring the adapters on the MKS Integrity Agent.
