Bear Versus Shark: What Would You Choose?

Indent First Line of Each New Paragraph (Use Tab Key)

"Would you rather lose your sense of sight or your sense of hearing? Would you rather lose an arm or a leg?" Such questions often crop up in classroom ice breaker and party games, and they force people to consider unthinkable situations and make uncomfortable decisions. Perhaps the world's least known, yet most controversial, "would you rather?" question is this: "Would you rather fight a blind bear or a toothless shark?" Ms. Phalen of Forest View High School has been asking this question since 2008, and this line of questioning has seldom failed to produce anything short of a heated debate. The naïve tend to immediately choose the blind bear; however, the truly sage know that the best choice is the toothless shark.

[1.5"] First and foremost, in choosing a bear, one chooses certain death. Though the bear is blind, there are other senses to consider, including the sense of smell. Within the animal kingdom, bears are considered to have the most acute sense of smell, with a range that can be measured in miles ("Bear Series"). With this keen sense of smell, a bear does not even require the sense of sight during a fight; the bear could simply track the victim's movement using its nose. Moreover, a bear's ability to hear makes it an even more formidable opponent, as "Hearing is the black bear's first line of defense against danger because they can hear in all directions (and the smell) and they can hear farther than they can see in brushy forest" ("Senses & Abilities"). This multidimensional sense only further increases their ability to detect an opponent

Even blind bears can spot great MLA style in a paper! But seriously, never try to fight one.

The Broadview Guide to Writing: A Handbook for Students - Sixth Edition Corey Frost, Karen Weingarten, Doug Babington, Don LePan, Maureen Okun, 2017-05-30 Even the most useful reference guides are not always well shall we say riveting. A refreshing exception is the new Broadview Guide to Writing which is smart, helpful and even fun to read. Gerald Graff and Cathy Birkenstein authors of *They Say I Say: The Moves That Matter in Academic Writing*. Key Features: A coil bound reference text suitable for a range of introductory composition and writing courses. Divided into three sections: Writing Processes including Research, Argumentation and Style; Writing Mechanics: Grammar, Usage and Punctuation; Writing Contexts: Writing in different academic disciplines, Forms and conventions and citation. Comprehensive treatment of citation style guides with 2016 MLA style updates. Expanded treatment of research methods, argument structures and writing in the workplace. A unique section on *How to Be Good With Words* issues of gender, race, class, religion, sexual orientation, disability etc. Expanded coverage for those whose native language is not English. All new chapter on reading images. Extensive companion website featuring interactive exercises. Increasingly, writing handbooks are seen as over produced and overpriced. One stands out: The Broadview Guide to Writing is published in an elegant but simple format and sells for roughly half the price of its fancier looking competitors. That does not change with the new edition, what does change and stay up to date is the content of the book. The sixth edition brings a substantial re organization of the contents under three headings: Writing Processes, Writing Mechanics and Writing Contexts. Coverage of APA, Chicago and CSE styles of documentation has been substantially expanded and the MLA section has now been fully revised to take into account all the 2016 changes. Also expanded is coverage of academic argument of writing and critical thinking of writing about literature of paragraphing of how to integrate quoted material into one's own work of balance and parallelism and of issues of gender, race, religion etc. in
