### BEFORE INSTALLATION

This information is included as a quick reference installation guide. Refer to the control panel installation manual for detailed system information. If the module will be installed in an existing operational system, inform the operator and local authority that the system will be temporarily out of service. Disconnect power to the control panel before installing the module.

Notice: This manual should be left with the owner/user of this equipment. This product is intended for use in ordinary indoor locations.

### GENERAL DESCRIPTION

The MOD2W allows a control panel to receive a "need for maintenance" signal from two-wire i<sup>3</sup> series smoke detectors, model numbers 2W-B, 2WT-B and one 2WTR-B. The module uses a form C zone relay to initiate "out of sensitivity" and "freeze trouble", a form A zone alarm relay and a second form A zone relay to indicate loop fault. An EZ Walk Test puts all detectors on the loop into a Walk Test mode for easy verification of detector loop wiring. The module allows 2-wire smoke detectors to be used on any compatible 4-wire control panel and provides Style D wiring on the detector loop.

### VISIBLE ANNUNCIATION

The MOD2W has three visible LED's: The green LED is a supervisory LED; it blinks during power on, reset, and during normal operation. The yellow LED

is used to indicate a loop wiring fault and will blink when it is in EZ Walk test mode. The red LED signals smoke events; it blinks during smoke maintenance events and lights constantly during smoke alarm events.
