Automatic Processing of Various Levels of Linguistic Phenomena Božo Bekavac, Kristina Vučković, 2012-01-18. Every year since 2002 the linguistic development environment NooJ has been enhanced with new online features that allow social scientists to develop new applications and explore new domains. The 2011 conference was no exception and the arrival of v3.0 has brought many more features and a new range of applications from the analysis of ancient Arabic and old English texts to the analysis of conversations held by the Mars500 mission's astronauts. At the 2011 conference members of the European Meta-Net CESAR project announced that NooJ will soon be available Open Source and will become the de facto standard tool for corpus processing in European research in Social Science. Today NooJ is used as a research tool in over 30 academic and research centers in the world and there are NooJ modules available for over 20 languages. The international NooJ conference is organized every year. 50 participants present their work in the domains of linguistic formalization, corpus processing and natural language processing applications. The present volume contains a selection of papers from the NooJ 2011 International Conference which was held from 13-15 June 2011 in Dubrovnik, Croatia. This volume presents problems dealing with machine translation, information extraction, processing of multi-word units, automatic disambiguation, semantic analysis and psychological and literature analysis of various corpora. Linking Language, Trade and Migration Ruriko Otomo, 2023-06-21. This book examines the effect of trade policy on language, which represents an underrecognized area in the field of language policy and planning. It argues that trade policies like Japan's Economic Partnership Agreements (EPAs) have important consequences for national language education policies and for discourses about language and nation. Since 2008 Japan has signed the EPAs with Indonesia, the Philippines and Vietnam to recruit migrant nurses and eldercare workers and manage their mobility by

means of pre employment language training and the Japanese medium licensure examinations Through the analysis of these language management devices this book demonstrates that the EPAs are a manifestation and representation of contemporary language issues intertwined particularly with pressing issues of Japan s social aging and demographic change As the EPAs are intertwined with welfare economy social cohesion and international political and economic relations and competitiveness the book presents a far more complex picture of and a richer potential of language policy 日本語政策の現状と将来,2008 日本語政策の現状と将来 N1日本語政策の現状と将来,2011-11 2 Linguistics and Language Behavior Abstracts ,2006-10
