## **Johannesburg June Life Science Question Paper 2014:**

*Academic Life in the Measured University* Tai Peseta, Simon Barrie, Jan McLean, 2020-05-18 While a life in academia is still one bestowed with enormous privilege and opportunity on the inside its cracks and fragility have been on display for some time We see evidence of this in researchers bemoaning time spent applying for grants rather than doing research teachers frustrated at the ways student feedback data are deployed to feed judgements about them and doctoral students realising that they have little chance of securing full time academic work Yet in the public policy domain the opposite appears true academics left to their own devices in their elite ivory towers rarely ever do enough This collection addresses the fact that academic life deserves to be rigorously researched Its emphasis on the measured university traces how academic life had ceded itself to the logics of perverse measures and raises questions about whether the contemporary university may well have become too measured to adequately counter the political times now upon us The contributors explore the ways in which measurement inhabits paradoxical positions in these spaces It sketches the contours and consequences of mismeasurement including the personal costs to academic staff It examines our desires and fumbled efforts at institutional transformation and it puts on display our own ethical conduct The collection concludes with a call to chart a course for a revitalized moral economy of academic labour This book was originally published as a special issue of Higher Education Research

Development     *Inclusive Teaching in South Africa* Tsedisio M. Makoelle, 2016-08-31 Inclusive education presupposes an all inclusive approach where all learners are taught in regular classrooms regardless of background disability or social context While there has been much debate indications are that inclusive education has been gaining momentum The book is divided into six coherent sections that address the how of inclusive education both inside and outside of the classroom     *Managing Resource Abundance and Wealth* Jonathon W. Moses, Bjørn Letnes, 2017-05-19 Managing Resource Abundance and Wealth The Norwegian Experience describes the sundry and significant challenges both economic and political facing petroleum producing countries The volume outlines the pitfalls that policymakers encounter in the aftermath of a major resource discovery and what they can do to protect their countries from the most adverse consequences These lessons are derived from two very different sources The broader if still underdeveloped social science literature that examines the Paradox of Plenty in its disparate forms and the experience of a country that has successfully managed its natural resources over several decades As a small country on the margins of Europe Norway has stood up to powerful international interests in one of the world s most powerful industries Norway has exerted sovereign control over its natural environment and exploited its resources in a way that has delivered significant wealth to its citizens This volume explains how Norway has largely avoided the Paradox of Plenty It aims to demonstrate the variety of policy tools that are available to states rich in natural resources and how these tools can be adjusted to changing domestic and international contexts It considers a number of questions such as how countries need to administer and regulate the industry to consider the costs and benefits associated with various

contract and licensing regimes and fiscal arrangements to maintain competitiveness and avoid becoming too dependent upon the sector to maximize local content and to protect the broader economy from the volatility of petroleum prices The volume shows how the industry can be managed in a democratic just and ethical manner and for the benefit of the general population *Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)* Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events

**Knowledge, Power and Young Sexualities** Tamara Shefer, Jeff Hearn, 2022-07-27 This book troubles the ways young people have been constructed as trouble through critical readings of the effects and impacts politically and ideologically globally and locally of scholarship and practice directed at South African young people s sexualities over the last three decades of addressing HIV GBV and other sexual and gender justice challenges Located primarily in South Africa the book speaks to global concerns about the politics of knowledge and transnational flows of information and practice with respect to gender and sexuality and is framed by global imperatives and analyses located in transnational postcolonial and intersectional feminist frameworks The key argument developed here and explored in relation to several different forms of research and practice is that efforts to challenge HIV GBV and unequal sexual and gender practices among young people particularly as evident in heterosexual relationships have tended to reflect and reproduce re new ed orthodoxies about sexuality gender family and young people while bolstering global and local racist classist othering of certain communities and nation states and reiterating the innocence and authority of those already

privileged and centred The book contributes to critical reflexive work on global practices of knowledge and its complex enmeshment with power in the terrain of sexual and gender justice work aimed at young people     **T.P.'s Weekly** ,1910
