Minority Report Technology Real:

Covering Extended Reality Technologies in the Media Emma Kaylee Graves, 2023-12-28 This book presents a study of the news coverage of extended reality technologies virtual augmented and mixed reality or XR and how this news corresponds with the marketing of XR products Focusing on a group of recently emerging technological products the book offers in depth analysis of the news coverage of XR technologies and explores the overlap between news discourse and promotional discourse by comparing the way these products are framed in the news and their marketing materials Using both quantitative and qualitative data it discusses the topics covered in XR news as well as the sources used and the specific framing techniques that appear in both XR news and marketing materials In addition to these findings it also provides a set of frame categories that can be used by other researchers analysing the media coverage of emerging technologies Ultimately arguing that the news represents XR in such a way that treats readers as consumers instead of citizens prioritising the interests of XR companies rather than news audiences this book will be of interest to students and researchers in media and communications discourse studies journalism PR and marketing and innovation studies as well as XR practitioners

Digital Destiny Shawn DuBravac, 2015-01-12 Our world is about to change In Digital Destiny How the New Age of Data Will Change the Way We Live Work and Communicate Shawn DuBravac chief economist and senior director of research at the Consumer Electronics Association CEA argues that the groundswell of digital ownership unfolding in our lives signals the beginning of a new era for humanity Beyond just hardware acquisition the next decade will be defined by an all digital lifestyle and the Internet of Everything where everything from the dishwasher to the wristwatch is not only online but acquiring analyzing and utilizing the data that surrounds us But what does this mean in practice It means that some of mankind's most pressing problems such as hunger disease and security will finally have a solution It means that the rise of driverless cars could save thousands of American lives each year and perhaps hundreds of thousands more around the planet It means a departure from millennia old practices such as the need for urban centers It means that massive inefficiencies such as the supply chains in Africa allowing food to rot before it can be fed to the hungry can be overcome It means that individuals will have more freedom in action work health and pursuits than ever

Lab Coats in Hollywood David A. Kirby, 2013-02-08 How science consultants make movie science plausible in films ranging from 2001 A Space Odyssey to Finding Nemo Stanley Kubrick s 2001 A Space Odyssey released in 1968 is perhaps the most scientifically accurate film ever produced The film presented such a plausible realistic vision of space flight that many moon hoax proponents believe that Kubrick staged the 1969 moon landing using the same studios and techniques Kubrick s scientific verisimilitude in 2001 came courtesy of his science consultants including two former NASA scientists and the more than sixty five companies research organizations and government agencies that offered technical advice Although most filmmakers don t consult experts as extensively as Kubrick did films ranging from A Beautiful Mind and Contact to Finding Nemo and The Hulk have achieved some degree of scientific credibility because of science consultants In Lab Coats in Hollywood David Kirby examines the interaction of science and cinema how science consultants make movie science plausible how filmmakers negotiate scientific accuracy within production constraints and how movies affect popular perceptions of science Drawing on interviews and archival material Kirby examines such science consulting tasks as fact checking and shaping visual iconography Kirby finds that cinema can influence science as well Depictions of science in popular films can promote research agendas stimulate technological development and even stir citizens into political action
