Iterative Solution Of Large Linear Systems David M Young:

Iterative Solution of Large Linear Systems David M. Young, 2014-05-10 *Iterative Solution of Large Linear Systems* describes the systematic development of a substantial portion of the theory of iterative methods for solving large linear systems with emphasis on practical techniques The focal point of the book is an analysis of the convergence properties of the successive overrelaxation SOR method as applied to a linear system where the matrix is consistently ordered Comprised of 18 chapters this volume begins by showing how the solution of a certain partial differential equation by finite difference methods leads to a large linear system with a sparse matrix The next chapter reviews matrix theory and the properties of matrices as well as several theorems of matrix theory without proof A number of iterative methods including the SOR method are then considered Convergence theorems are also given for various iterative methods under certain assumptions on the matrix A of the system Subsequent chapters deal with the eigenvalues of the SOR method for consistently ordered matrices the optimum relaxation factor nonstationary linear iterative methods and semi iterative methods This book will be of interest to students and practitioners in the fields of computer science and applied mathematics

Numerical Solution of Partial Differential Equations J.G. Gram, 2012-12-06

This book contains the transcripts of the invited lectures presented at the NATO Advanced Study Institute on Numerical Solution of Partial Differential Equations The Study Institute was held at the Netherlands Norwegian Reactor School Institutt for Atomenergi Kjeller Norway 20th 24th August 1973 The members of the Scientific Advisory Committee were A R Mitchell University of Dundee Scotland I HoI and University of Trondheim Norway T Havie UniverSity of Trondheim Norway The members of the Organizing Committee were E Andersen Institutt for Atomenergi Kjeller Norway G E Fladmark Institutt for Atomenergi Kjeller Norway J G Gram Institutt for Atomenergi Kjeller Norway The aim of the Study Institute was to bring together mathe maticians and engineers working with numerical methods The papers presented covered both theory and application of methods for solution of partial differential equations The topics were finite element methods finite difference methods and methods for solution of linear and nonlinear systems of equations with application to continuum mechanics and heat transfer The total number of participants was 68 Their names are given at the end of the book The publication of these proceed ings could be realized through the kind cooperation of the lec turers The Advanced Study Institute was financially sponsored by NATO Scientific Affairs Division The Organizing Committee wishes to express its gratitude for this support Valuable assistance was given by Mrs G
