

# What's in a System?

There are various types of systems in our world. Some are small and simple such as a hand tool like an electric mixer or power drill, and some are large like a city transit system or a health care system.

The components of systems are similar. They all have purposes, inputs, processes, and outputs, which allow them to perform a function. These parts work together for a common goal.

**A vegetable garden is an example of a simple system.**

Purpose of this garden system: to grow vegetables to eat

**Input:**  
soil, seeds,  
water, fertilizer

**Process:**
